

CMIT Solutions Launches Cybersecurity Evaluation Program for Oakland Businesses

OAKLAND, CA, UNITED STATES, April 10, 2025 /EINPresswire.com/ -- A new cybersecurity assessment initiative launched by [CMIT Solutions](https://www.cmitsolutions.com) is offering small and mid-sized businesses in Oakland and Walnut Creek a proactive approach to managing digital threats. This strategic development comes at a time when organizations face rising risks from ransomware, phishing, and data breaches.

The program is built around CMIT Solutions' proprietary Cybersecurity Assessment[®], designed to help companies evaluate vulnerabilities in their current infrastructure. Participating businesses receive a comprehensive risk profile, along with prioritized recommendations tailored to industry-specific compliance standards.

"As cyberattacks grow in both frequency and sophistication, it's critical for businesses to identify risks before they become incidents," said a representative from CMIT Solutions. "This assessment is not just a technical audit—it's a strategic tool for long-term operational resilience."

In addition to vulnerability scanning and risk scoring, the service incorporates consultation on regulatory compliance, from HIPAA to PCI-DSS. The goal is to bridge the gap between technical awareness and practical implementation across different business sectors.

About CMIT Solutions of Oakland: CMIT Solutions of Oakland delivers expert IT services with a focus on reliability, security, and scalability. Serving businesses across Oakland and Walnut Creek, the company provides proactive technology support through managed services,

cybersecurity solutions, and strategic IT consulting.
