# Leading EU Cybersecurity Provider Cuts Threat Processing Time by 50% with ANY.RUN

DUBAI, DUBAI, UNITED ARAB EMIRATES, April 10, 2025 /EINPresswire.com/ -- Expertware, a leading IT security provider in the European Union, partnered with ANY.RUN, a developer of interactive malware analysis and threat intelligence services, to accelerate threat analysis and ensure faster response. The outcome, as reported by the company Cyber Intelligence Operations Lead, is a 50% reduction in malware investigation time.

Expertware replaced time-consuming manual setups with ANY.RUN's Interactive Sandbox. This shift has enabled real-time analysis of threats like phishing campaigns and infostealers, cutting time on IOC extraction and malware investigations by over 50%.

The company uses ANY.RUN's products for:

· Malware investigations to observe malicious behavior, network indicators, and potential dropper actions.

· Phishing analysis to see how attachments or malicious scripts are executed within a controlled

environment.

· Indicator extraction and mapping to see the full scope of cyber attacks and collect actionable insights.

· Training & collaboration to facilitate analysis and help junior analysts develop their skills.
