

# Quiet by Design: NoiseCure Brings Purpose-Built Acoustic Solutions

*High-Stakes Healthcare Environments Demand Sound Strategies That Work*

DALLAS, TX, UNITED STATES, April 18, 2025 /EINPresswire.com/ -- In healthcare settings where every detail matters, NoiseCure™ is redefining what it means to design for healing. Specializing in acoustic solutions for high-stakes environments, NoiseCure™ delivers tailored, evidence-based strategies that reduce noise, support recovery, and improve the overall experience for patients, families, and care teams.

Noise is one of the most persistent and underestimated challenges in healthcare design. It affects sleep, communication, stress levels, and long-term outcomes — especially in emergency departments, NICUs, patient rooms, and surgical units.

NoiseCure™ works alongside healthcare architects, designers, and facility leaders to address this issue head-on.

“

In clinical environments, excess noise isn't just an annoyance — it's a risk”

*Sara Beth Joyner*

“In clinical environments, excess noise isn't just an annoyance — it's a risk,” said Sara Beth Joyner, CEO at NoiseCure™. “Our goal is to provide acoustic strategies that enhance both function and feeling — spaces that promote clarity, comfort, and care.”

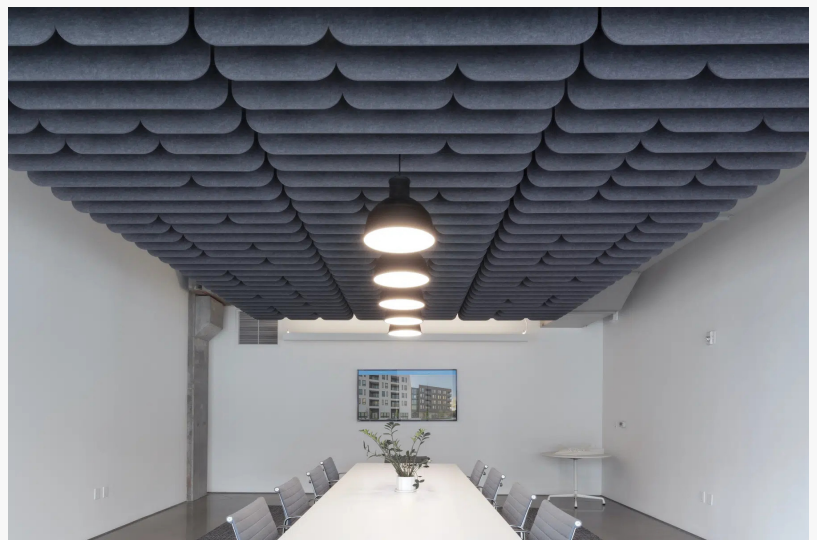

NoiseCure's solutions are built for healthcare performance — from custom acoustic panels and ceiling treatments that blend seamlessly into interior

NoiseCure delivers precise, design-forward acoustic solutions in critical environments that reduce noise without compromising style.

finishes, to sound-absorbing artwork that serves both aesthetic and functional roles. Every product and plan is thoughtfully developed with healthcare needs in mind, offering options that meet infection control standards, stand up to rigorous use, and comply with industry codes.

By focusing on acoustic performance as a core part of environmental design, NoiseCure™ helps healthcare facilities create calmer, more effective spaces for healing. Whether addressing new construction projects or retrofitting existing buildings, the team brings both design sensitivity and technical expertise to every engagement.

Loftwall's ceiling baffles are engineered to bring acoustic control and modern design overhead

"Hospitals are built for care, but too often they're filled with noise that disrupts it," said Andrew White, Project Coordinator. "We're here to help healthcare organizations reimagine what their spaces sound like — and how that sound affects everyone inside." As healthcare systems evolve, so does the need for thoughtful, holistic design. NoiseCure™ exists to bring intention to the one element that's always present but rarely seen — sound.

#### About NoiseCure™

NoiseCure™ delivers tailored acoustic solutions for high-stakes environments, with a specialized focus on the healthcare industry. From custom product development to full acoustic strategy, NoiseCure™ blends evidence-based design, aesthetic integration, and technical expertise to reduce noise and elevate experience in the spaces that matter most.
