

# Omni Aesthetics Introduces OmniWave Soundwave Therapy: A New Era in Non-Invasive Pain and Injury Treatment

*Omni Aesthetics launches OmniWave Soundwave Therapy to boost healing, ease pain, and enhance regenerative treatments—non-invasive and highly effective.*

OAKLAND, NJ, UNITED STATES, April 10, 2025 /EINPresswire.com/ -- [Omni Aesthetics](#), a leading name in regenerative and aesthetic medicine, is excited to announce the launch of OmniWave Soundwave Therapy, an innovative treatment that uses advanced acoustic wave technology to accelerate healing, alleviate pain, and rejuvenate tissue—safely, effectively, and non-invasively.

“

Our goal is to offer the most advanced, non-surgical options to restore function and relieve pain. With OmniWave, we're giving patients a transformative new way to heal.”

*Dr. H. William Song*

Combining high-velocity sound waves with deep tissue stimulation, OmniWave activates the body's natural recovery mechanisms, making it an ideal solution for orthopedic concerns such as [joint pain](#), chronic inflammation, and soft tissue injuries. This groundbreaking

technology enhances circulation, breaks down scar tissue, and promotes cell regeneration, allowing patients to experience faster, more comprehensive relief.

## Enhanced Regenerative Results with PRP and Stem Cell Therapy

As part of its commitment to delivering cutting-edge solutions, Omni Aesthetics now offers OmniWave Therapy in combination with Platelet-Rich Plasma (PRP) and Stem Cell Joint Injections. These regenerative treatments harness the body's own healing capabilities:

-PRP Therapy involves isolating and concentrating platelets from a patient's own blood to repair damaged tissue and reduce inflammation.

-Stem Cell Injections utilize regenerative cells harvested from a patient's own fat, promoting repair and regrowth in injured areas.

When paired with OmniWave Soundwave Therapy, the results are even more powerful. The

acoustic waves help prime the tissue environment, enhancing treatment absorption and accelerating the body's healing response.

“Our goal is to offer the most advanced, non-surgical options to restore function and relieve pain,” said [Dr. H. William Song](#), founder of Omni Aesthetics. “With OmniWave, we’re giving patients a transformative new way to heal—faster, naturally, and without downtime.”

About Dr. H. William Song and Omni Aesthetics

Dr. H. William Song has been at the forefront of aesthetic and regenerative medicine since 2007, following a distinguished career as a board-certified internal medicine specialist. A globally respected educator and trainer, Dr. Song serves as faculty for the Cellular Medicine Association, Advanced Aesthetics Education Group, and the American Academy of Stem Cell Physicians. He is regularly featured on major platforms such as Good Morning America and Princeton Community Television.

At Omni Aesthetics, patients receive expert care in a welcoming, educational, and honest environment. Known for blending artistry with medical precision, the practice specializes in minimally and non-invasive procedures with a personalized approach. As an advanced training and clinical study site, Omni Aesthetics continually raises the bar for excellence in aesthetic medicine.
