

Space Force Association Announces New Partners Intuitive Machines, Sigmatech, General Dynamics Mission Systems, Telesat

COLORADO SPRINGS, CO, UNITED STATES, April 11, 2025

/EINPresswire.com/ -- The [Space Force Association](#) (SFA) is thrilled to

announce the addition of four exceptional corporate partners: Intuitive Machines, Sigmatech, General Dynamics Mission Systems, and Telesat. These partnerships represent a continued commitment to advancing space and defense technology, ensuring the United States remains at the forefront of space innovation and security.

SFA's new corporate partnerships

Intuitive Machines

Intuitive Machines is a leader in developing and deploying space exploration technologies, specializing in lunar landers, spacecraft, and precision landing systems. Their cutting-edge technology aims to advance space exploration by enabling sustainable operations on the Moon and beyond. Intuitive Machines' work supports the Space Force Association's mission of ensuring the United States remains at the forefront of space exploration and national defense.

Sigmatech

Sigmatech is a trusted provider of engineering, technical, and operational solutions for both government and commercial clients. Specializing in systems engineering, logistics, and software development, Sigmatech supports a variety of defense, space, and aerospace operations. The company's ability to deliver innovative solutions across complex domains aligns with the Space Force Association's mission to foster technological advancement in space defense and exploration.

General Dynamics Mission Systems

General Dynamics Mission Systems is a leader in providing mission-critical systems for defense, space, and intelligence agencies. They deliver high-performance solutions, including secure communications, data analytics, and intelligence technologies, which are essential for space operations. With a focus on advancing defense capabilities, General Dynamics Mission Systems plays a vital role in supporting the U.S. Space Force's mission to ensure space superiority.

Telesat

Telesat is one of the world's largest and most innovative satellite operators, delivering cutting-edge satellite connectivity solutions. Telesat's next-generation Telesat Lightspeed™ network promises to revolutionize broadband connectivity by providing high capacity, ultra-low latency, and fiber-like speeds globally. As the world increasingly relies on space-based communication, Telesat's solutions play a key role in enhancing space operations and infrastructure.

A Shared Vision for Space Innovation

These partnerships reinforce the Space Force Association's commitment to fostering collaboration across the defense and space sectors. Through these relationships, the SFA and its partners aim to enhance operational capabilities, drive innovation, and ensure national security in an increasingly contested space domain.

About the Space Force Association

The Space Force Association (SFA) is the only independent 501(c)(3) non-profit dedicated to supporting the United States Space Force, U.S. Space Command, national spacepower, and the efforts of global partners and allies in space exploration. As a professional military association, the SFA focuses on advancing spacepower through research, advocacy, and education. The SFA provides a platform for collaboration, professional development, and education to promote the advancement of space power in defense of the nation. The association also plays a vital role in supporting the dedicated men and women of the U.S. Space Force. Membership is open to both military personnel and civilians.
