

Fanny Bridge Replacement in Tahoe City Slated for Summer 2025, Thompson Builders at the Helm of \$10.6M Project

TAHOE CITY, CA, UNITED STATES, April 15, 2025 /EINPresswire.com/ -- [Thompson Builders Corporation](#) (TBC), in partnership with the Federal Highway Administration, is set to begin construction on the historic Fanny Bridge in Tahoe City this summer. The \$10.6 million infrastructure project will include the complete demolition and replacement of the existing bridge, with work commencing in June/July 2025 and continuing through November 2025.

The new bridge will feature a clear-spanning precast structure, utilizing the existing abutments to streamline construction and reduce long-term impacts on traffic and the local community. This approach allows for a shorter construction timeline and limits the project's environmental footprint.

To prepare for the full replacement, early-stage work will begin at night, requiring single-lane closures during off-peak hours. Starting August 11, 2025, the bridge will be fully closed to all traffic to allow for the safe demolition of the existing structure and installation of the new bridge.

Key features of the new bridge include:

- Improved pedestrian access with sidewalks on both sides
- New traffic control and pedestrian signals
- Environmentally conscious construction with river diversion and dewatering plans to protect
