

The Mitigation Banking Group Launches Interactive Tool to Simplify Wetland Mitigation in Florida

New GIS-powered platform simplifies wetland mitigation by helping users instantly identify service areas and eligible mitigation banks by location.

WINTER SPRINGS, FL, UNITED STATES, April 17, 2025 /EINPresswire.com/ -- The Mitigation Banking Group, Inc. (MBG), Florida's leading provider of mitigation and conservation banking

services, has officially launched MitigationBankSearch.com, a groundbreaking interactive platform designed to help environmental consultants, developers, engineers, attorneys, and landowners instantly determine which mitigation banks can serve their project site—simply by entering a property address or parcel number.

“

Making mitigation decisions used to take days—now it takes seconds.”

Victoria Bruce

“Wetland mitigation banking is a fascinating but complex industry. Most people don’t even know it exists—until they receive a permit condition requiring mitigation credits. At that point, understanding your drainage basin and service area becomes mission-critical. This tool is here to make that easier,” said [Victoria Bruce](#), CEO and Founder of

MBG.

MitigationBankSearch.com is a user-friendly, GIS-powered platform built to simplify the often-confusing process of locating mitigation banks and service areas. Once a user enters a location, the platform automatically zooms in and displays all applicable federal and state mitigation service areas, water management districts, drainage basins, and HUC-8 (Hydrologic Unit Code) boundaries. All data panels are dynamic and adjust in real time based on the user's map view, displaying only the most relevant information. This significantly reduces the time and effort previously required to gather these details from various sources.

Designed for both office and field use, the tool is fully mobile-optimized, allowing consultants

and developers to access real-time data on phones, tablets, and laptops while onsite. The intuitive interface eliminates the need to sort through outdated documents or contact multiple agencies, offering a streamlined experience that improves accuracy and efficiency in wetland mitigation planning.

Wetland mitigation is a critical and often unfamiliar part of the permitting process. Each project is unique, and knowing which mitigation bank can serve a particular site depends entirely on geographic and regulatory boundaries. Until now, finding this information required hours of research and coordination. With MitigationBankSearch.com, users can now complete this step in seconds—saving time, avoiding delays, and ensuring compliance from the very beginning.

After confirming the appropriate service areas, users can quickly connect with MBG to secure the necessary mitigation credits and move forward with confidence. Whether planning a new development, responding to permit conditions, or advising a client on next steps, MitigationBankSearch.com empowers users to make faster, smarter, and more compliant decisions.

[MitigationBankSearch.com is live and free to use](#). It represents a major leap forward for environmental professionals across Florida, delivering the clarity and convenience needed to navigate the complexities of wetland mitigation with ease.

MBG currently represents over 25 mitigation and conservation banks across Florida. As a trusted partner to landowners, consultants, and agencies, the firm provides comprehensive support across permitting strategy, credit fulfillment, regulatory compliance, and market analysis. With unmatched industry expertise, MBG remains committed to delivering tools and services that make mitigation easier and more efficient for everyone involved.
