

Managed VPN Market Size Expected to Reach US\$ 143.12 Billion at a CAGR of 19.2% by 2034: Fact.MR Report

Managed VPNs Gaining Attention across Businesses in Several Industries to Protect Sensitive Data and Communication Routes: Fact.MR Report

ROCKVILLE, MD, UNITED STATES, April 14, 2025 /EINPresswire.com/ --

According to the latest industry research report published by Fact.MR, a market research and competitive intelligence provider, the worldwide [managed VPN market](#) is estimated to achieve a valuation of US\$ 24.61 billion

in 2024 and further increase at a notable CAGR of 19.2% from 2024 to 2034.

Due to the rising advanced cyberattacks and computer hacking, businesses across several industries are focusing on safeguarding critical data and ensuring that communication channels are secure. Because managed VPNs provide strong encryption and secure access protocols, they are an essential component of this defense approach. By blocking unauthorized access to networks and data, these solutions provide businesses with an assurance that data is secure while it is in transmission mode.

Managed VPNs are a crucial component of contemporary cybersecurity frameworks because, by contracting with specialized vendors to handle VPN maintenance, businesses leverage advanced security features without requiring a sizable internal staff.

North America holds a leading position in the market because of its established IT infrastructure, early adoption of cybersecurity solutions, and widespread remote work culture. The requirement for managed VPN services in this area is also growing due to stringent data protection regulations that apply to global operations, such as the CCPA and GDPR.

Key Takeaways from Market Study

The global market for managed VPNs is analyzed to reach a value of US\$ 143.12 billion by 2034-end.

The North American region is forecasted to lead with a 5% worldwide market share in 2024.

Demand for managed VPNs in Japan is projected to increase at a CAGR of 20.1% between 2024 and 2034.

The market in East Asia is approximated to reach a size of US\$ 38.79 billion by 2034.

In East Asia, China is estimated to account for 9% of the revenue share in 2024.

By type, demand for site-to-site VPN is evaluated to increase at a 20% CAGR from 2024 to 2034.

“To reach a larger customer base, major competitors in the managed VPN industry are adding features, such as cloud security, multi-factor authentication, improved encryption, and network monitoring to their packages,” says a Fact.MR analyst

Leading Players Driving Innovation in the Managed VPN Market

ExpressVPN; OpenVPN; Perimeter 81; SonicWall; Cisco; Fortinet; VMware; Zscaler; Barracuda Networks; Palo Alto Networks; MikroTik; NordVPN; Citrix.

Demand for Site-to-Site VPNs Continued to be Stronger than Other Type

Demand for site-to-site VPNs is high in comparison with remote access VPNs due to their capacity to establish secure connections with several distant office locations or data centers via the Internet. For several companies with operations all over the world, this is a profitable aspect. Site-to-site virtual private networks (VPNs) enable companies to create secure communication channels between several physical locations, guaranteeing data transfer across large geographic regions.

Large multinational firms widely employ these capabilities because they provide scalable and affordable leased line options. In addition, the popularity of remote work is constant, which is further the driving need for site-to-site VPNs.
