

# Endoscopy Devices Market Growing at a Rapid Pace by 2033 | Trends and Future Forecasting

*The endoscopy devices market is expected to grow from an estimated USD 29.3 billion in 2024 to USD 45.5 billion in 2033, at a CAGR of 5.00%.*

VANCOUVER, BRITISH COLUMBIA, CANADA, April 14, 2025 /EINPresswire.com/ -- The Global [Endoscopy Devices Market](#) research study published by Reports and Data is an extensive collection of insightful information about the Endoscopy

Devices industry. The report covers the Endoscopy Devices Market segmentation along with a detailed outline of the Endoscopy Devices market size with regards to volume and valuation. The report provides comprehensive coverage of the Endoscopy Devices market scenario for the current period and forecast timeline of 2020-2027. The Endoscopy Devices market report contains an in-depth analysis of the historical, current, and projected revenues for every industry vertical, segment, end-use industries, applications, and regions.

The global endoscopy devices market is projected to grow from an estimated USD 29.3 billion in 2024 to USD 45.5 billion by 2033, registering a CAGR of 5.00% during the forecast period. This growth trajectory is driven by continuous advancements in medical technology and the rising global preference for minimally invasive surgical procedures. According to the World Health Organization (WHO), the volume of surgeries performed worldwide has surged significantly, underscoring the growing importance of advanced surgical tools like endoscopy devices.

Minimally invasive endoscopic procedures are increasingly favored due to their benefits, including shorter recovery times, reduced risk of complications, and lower overall healthcare costs. Additionally, the escalating prevalence of chronic diseases—such as gastrointestinal, respiratory, and urological conditions—is significantly boosting the demand for diagnostic and therapeutic endoscopic interventions. The World Gastroenterology Organization reports that over 40% of the global population is affected by gastrointestinal diseases, further intensifying the

Emergen Research Logo

need for procedures such as gastrointestinal endoscopy.

Moreover, major market players are heavily investing in innovation through product launches and strategic collaborations, thereby accelerating market growth. For instance, in March 2024, Olympus Corporation introduced an ultra-high-definition endoscopic camera system designed to enhance diagnostic precision and improve patient outcomes.

The rising preference for outpatient care, supported by the increasing number of Ambulatory Surgery Centers (ASCs) and the broader shift toward outpatient procedures, is another crucial factor propelling the expansion of the endoscopy devices market.

## Market Drivers

### 1. Technological Advancements

Continuous innovation in endoscopic technology has been a pivotal factor driving market growth. Key developments such as high-definition (HD) imaging, 3D visualization, and robotic-assisted endoscopy systems have significantly enhanced procedural accuracy and efficiency, leading to improved clinical outcomes and patient satisfaction.

According to the American Society for Gastrointestinal Endoscopy (ASGE), approximately 40% of gastrointestinal endoscopies now utilize advanced imaging technologies such as narrow-band imaging and confocal laser endomicroscopy. These technologies are particularly effective in detecting early-stage cancers and other abnormalities, thereby improving diagnostic rates and enabling earlier interventions.

### 2. Growing Adoption of Single-Use Endoscopes

The adoption of single-use (disposable) endoscopes has risen sharply, primarily due to heightened concerns over infection control and cross-contamination. The U.S. Food and Drug Administration (FDA) reports that the use of single-use endoscopes in both outpatient and inpatient settings increased substantially in 2023, and this trend is expected to continue as manufacturers focus on making these devices more cost-effective and user-friendly.

## Key Benefits of the Report:

- Comprehensive analysis of the competitive scenario and its changing dynamics
- Analytical data with detailed SWOT analysis and Porter's Five Forces analysis
- In-depth 8-year analysis of the Global Endoscopy Devices Market
- Critical understanding of the key market segments
- Comprehensive analysis of the drivers, restraints, trends, and opportunities
- Detailed regional analysis and extensive company profiling
- Extensive assessment of current and emerging trends of the market

Regional Analysis of the Endoscopy Devices Market:

- North America (U.S., Canada)
- Europe (U.K., Italy, Germany, France, Rest of EU)
- Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)
- Latin America (Chile, Brazil, Argentina, Rest of Latin America)
- Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

Thank you for reading our report. For further details or to inquire about customization, please let us know and we will offer you the report as per your needs.
