

# Neuroscience ACCUMIN delivers real-time data insights from NEI, Psych Congress' preeminent thought leaders

*Membership in HMP Global's new service provides immediate access to expert perceptions of neuroscience data releases, FDA announcements, and market activity.*

MALVERN, PA, UNITED STATES, April 16, 2025 /EINPresswire.com/ -- Insights from preeminent neuroscience thought leaders on breaking news and major clinical trial data releases are now available in real time through HMP Global's new service—Neuroscience ACCUMIN: Accumulated Insight.

With the global market for central nervous system (CNS) therapeutics projected to reach \$137 billion this year, unbiased and timely analysis of the latest neuroscience findings is crucial for stakeholders in the field. A subscription to Neuroscience ACCUMIN provides immediate access to actionable insights that can inform data generation, medical, marketing, and business strategies.

The Neuroscience ACCUMIN panel is comprised of international experts associated with leading mental healthcare education brands Psych Congress and Neuroscience Education Institute (NEI).

The Neuroscience ACCUMIN panel is comprised of international experts associated with leading mental healthcare education brands Psych Congress and Neuroscience Education Institute (NEI). Their perspectives empower decision-makers in pharmaceuticals, finance and other healthcare-related industries to understand the implications of new developments in the mental health field and leverage this insight to set effective growth strategies for their businesses.

Serving as Neuroscience ACCUMIN's Chief Medical Officer is psychiatrist Greg Mattingly, MD, Founding Partner, Midwest Research Group and an Associate Clinical Professor at Washington University.

"The strength of Neuroscience ACCUMIN lies in its panel of internationally recognized experts," he said. "Their unbiased and candid commentary offers invaluable context and clarity around

This analysis is crucial for innovators seeking a reliable and objective understanding of the neuroscience landscape."
