

Trident IoT is now authorized for Z-Wave Controller certification testing

CARLSBAD, CA, UNITED STATES, April 17, 2025 /EINPresswire.com/ -- Trident IoT is pleased to announce that it has been officially approved as an authorized test lab for Z-Wave Controller certifications on both the Z-Wave Plus and Z-Wave Plus v2 standards and specifications.

With this approval, Trident IoT can now offer product developers a streamlined path to full Z-Wave system certification, ensuring any Z-Wave product meets the rigorous standards set by the Alliance.

“Our approval as a test lab for Z-Wave controllers was the last piece in providing full support for

“

Trident IoT’s expanded capabilities will provide developers with more options and greater efficiency in bringing certified Z-Wave solutions to market.”

Program Manager for the Z-
Wave Alliance*

Z-Wave ecosystem developers and further reinforces our commitment to helping companies bring reliable, and compliant products to market faster.” said Mariusz Malkowski, Chief Technology Officer of Trident IoT.

“Certification is the foundation of the Z-Wave ecosystem, ensuring that every device meets the highest standards for interoperability, security, and reliability,” said Bettina Roll, Certification Program Manager for the Z-Wave Alliance.

“Trident IoT’s expanded capabilities will provide developers with more options and greater efficiency in bringing certified Z-Wave solutions to market. This milestone not only strengthens the certification program but also reinforces the Alliance’s commitment to a robust and

interoperable smart home ecosystem.”

The addition of Z-Wave controller testing services complements Trident IoT’s existing service offerings, including Zigbee and Matter testing, RF performance testing and design and development services. The company’s state-of-the-art testing facilities and expert team ensure that products comply with the latest wireless standards and regulatory requirements, facilitating smooth market entry for global manufacturers.
