

Point of View Medical Aesthetics First in Canada to Introduce the Mosaic 3D Resurfacing Laser

First in Canada: Point of View Medical Aesthetics launches Mosaic 3D, a breakthrough laser resurfacing treatment for next-level skin rejuvenation.

CALGARY, ALBERTA, CANADA, April 17, 2025 /EINPresswire.com/ -- Point of View Medical

“

This advanced technology allows us to provide our clients with significant improvements in skin tone and texture, reduction in fine lines and wrinkles... all with greater comfort and less downtime.”

Carissa, founder of POV.

Aesthetics, a [leading Calgary anti-aging clinic](#) specializing in cosmetic injectables like [Botox, dermal filler, laser resurfacing](#), and skincare, announces the introduction of the Mosaic 3D laser resurfacing system by Cynosure Lutronic to their aesthetics clinic—a first in the Canadian aesthetic market. This Health Canada-approved technology represents Point of View's commitment to bringing cutting-edge aesthetic solutions to Canadian patients.

Revolutionary Skin Resurfacing Technology

The Mosaic 3D system represents the next generation of fractional non-ablative skin resurfacing technology. This

sophisticated platform utilizes a 1550 nanometer Erbium Glass laser to effectively improve skin tone and texture while reducing fine lines, wrinkles, acne scars, and uneven pigmentation.

What sets the Mosaic 3D apart is its ability to deliver exceptional results with minimal downtime and enhanced patient comfort. The system features:

- Integrated air cooling through the handpiece and cold compression sapphire tips
- 3D Controlled Chaos Technology™ (3D CCT) for optimized laser pulse distribution
- IntelliTrak™ system with metal rollers for rapid, uniform treatment coverage
- Combined air-cooled rolling and sapphire tip stamping in one versatile system

These innovations significantly reduce pain, erythema, and edema while maximizing energy delivery to targeted tissues and minimizing the risk of bulk heating.

Calgary's Leader in Medical Aesthetics

Located in the heart of Calgary, Point of View Medical Aesthetics has established a reputation for

excellence in aesthetic injectables and comprehensive skincare solutions. The clinic focuses on delivering natural-looking results that enhance each client's unique beauty.

With a team of experienced providers, Point of View takes a holistic approach to anti-aging and beauty treatments, ensuring clients feel comfortable throughout their self-care journey. This pioneering introduction of the Mosaic 3D reinforces the clinic's position as a leader in the Canadian aesthetic market.

"Point of View Medical Aesthetics is thrilled to announce that we are the first in Canada to offer the revolutionary Mosaic 3D laser resurfacing treatment," says Carissa, founder of POV. "This advanced technology allows us to provide our clients with significant improvements in skin tone and texture, reduction in fine lines and wrinkles, and diminished acne scars, all with greater comfort and less downtime. This aligns perfectly with our mission to offer personalized, top-tier aesthetic services that deliver exceptional results and enhance our clients' confidence."

A Canadian First

As the first provider of the Mosaic 3D laser resurfacing system in Canada, Point of View Medical Aesthetics gives Canadian patients access to state-of-the-art skin rejuvenation previously unavailable within the country. This groundbreaking offering eliminates the need for patients to seek this advanced treatment internationally.
