PraxiChain is a collective of industry specialists that combine battle-tested expertise with real-world innovation to tackle industrial companies' unique supply chain and logistics challenges."

James Shefelbine is a Principal at PraxiChain Consulting.

PraxiChain, a leading industrial supply chain and logistics consultancy, today announced the launch of its comprehensive Supply Chain Design solution, developed specifically for industrial companies facing complex logistics challenges in today's dynamic business environment.

The new offering combines PraxiChain's 30+ years of industry experience with practical innovation to help clients transform complexity into profit. Unlike theoretical approaches, this solution delivers actionable strategies backed by the firm's 50+ supply chain experts who have collectively implemented over 500 transformative projects.

"While others theorize, we deliver practical solutions that drive measurable business results," said [James Shefelbine](#), Principal at PraxiChain. "Our approach combines battle-tested expertise with real-world innovation to tackle industrial companies' unique challenges, from raw materials to final delivery. We don't just consult; we solve."

The solution addresses key areas, including:

- Supply Chain Design: Optimizing networks to balance efficiency with resilience
- Market Analysis: Identifying growth opportunities through data-driven insights
- Due Diligence: Providing a comprehensive analysis for strategic decision-making
- Logistics Procurement: Maximizing negotiating leverage with service providers
- Assessment & Optimization: Transforming operations while building sustainable, resilient supply chains

PraxiChain has already implemented this solution with several clients in the chemicals, building materials, mining, and energy sectors. Its documented success stories show significant cost savings and operational improvements.

"PraxiChain's data-driven approach gave us confidence in our infrastructure investments. Their three-terminal strategy perfectly balanced transportation economics with market accessibility," said a Director of Logistics at a Global Agricultural Products Firm, one of PraxiChain's clients.

The company's deep industry specialization enables it to understand unique challenges, speak the operational language from day one, and deliver solutions faster than generalist firms.

About PraxiChain

PraxiChain transforms complex supply chain and logistics challenges into measurable business outcomes through battle-tested expertise and real-world innovation. Focusing on industrials, transportation and logistics, private equity, traditional energy, and renewable energy sectors, PraxiChain helps organizations optimize their business models and logistics networks. The firm's collective team brings seasoned wisdom and dynamic innovation to every challenge, seeing hidden patterns and opportunities others miss. Our full capabilities include: Supply Chain Design, Market Analysis, Due Diligence, Logistics Procurement, and Assessment and Optimization.
