

# Mexico Bariatric Center® Introduces Innovative SASI-S Procedure: Get Sassy with SASI

*Mexico Bariatric Center now offers the advanced Single Anastomosis Sleeve Ileal (SASI) bypass for powerful, lasting weight loss and improved metabolic health.*

SACRAMENTO, CA, UNITED STATES, May 2, 2025 /EINPresswire.com/ -- [Mexico Bariatric Center](#), a leading provider of bariatric surgery in Mexico, is thrilled to announce the availability of the Single Anastomosis Sleeve Ileal ([SASI-S](#)) bypass procedure. This cutting-edge weight-loss surgery offers a promising option for individuals seeking significant and sustainable weight loss.

The SASI-S procedure combines the benefits of a sleeve gastrectomy with an intestinal bypass, leading to reduced calorie absorption and hormonal changes that promote weight loss and improve cardiometabolic health. Mexico Bariatric Center® is proud to be among the first to offer this advanced technique to its patients.

"The SASI procedure represents a significant advancement in bariatric surgery, offering potentially greater weight loss and metabolic benefits with less risk and side effects compared to traditional procedures," said Ron Elli.
