unveiling of Workplace Agents today, a group of trusted autonomous AI agents that leverages advances in Agentic reasoning and combines the company's experience in enterprise workflows, security, and compliance to help organizations scale their next-generation digital workforce exponentially with human-like intelligence 24/7. Today's launch of Workplace Agents follows the successful March release of Avaamo's Healthcare Workforce, extending the company's digital worker portfolio into enterprise employee support.

## Unveiling Avaamo Workplace Agents

In an environment where employee experience, operational efficiency, and talent retention are taking center stage, we believe our next-generation digital workforce will assist organizations in enhancing employee support and improving workplace satisfaction. Our workplace agents include:

### Faith – IT Support

Faith handles authentication, basic troubleshooting, ticket creation, and connects employees with live agents when needed, speaking naturally in the language of your choice.

### Grace – HR

Grace specializes in Human Resources, managing time-off requests and answering questions about attendance policies with precision and consistency.

### Grant – Procurement

Grant will optimize purchasing, manage vendor relationships, and drive cost efficiencies to support your organization's bottom line.

## James – Talent

James attracts top talent, streamlines the hiring processes, and builds the strategic workforce that drives a company's success.

## The Next-Generation Digital Workforce

As Avaamo Agents turns labor into software, Avaamo believes these newly unveiled autonomous agents enable customers to deliver business value today and develop their AI-based competitive edge. We will create many more next-generation agents in the coming year that will give customers the competitive advantage they need to future-proof their organizations.

"The unveiling of Avaamo Workplace Agents represents a fundamental shift in how enterprises approach their workforce," said Ram Menon, CEO & Co-founder of Avaamo. "By turning labor into software, we're enabling organizations to scale operations exponentially while maintaining the human-like intelligence that employees expect. Our next-generation Workplace Agents are just the beginning of what will become a comprehensive digital workforce spanning multiple industries and use cases."

## The Avaamo Agentic Platform

The Avaamo Agentic platform has been engineered from the ground up to power the next generation of AI agents capable of reasoning, planning, and autonomously executing user goals while rigorously adhering to enterprise workflow rules and compliance guardrails. Its distinctive capabilities—including "No Hallucinations," "Multi-Agent Orchestration," and "Consistent Reasoning"—address the critical challenges of deploying next-generation digital workforce agents in rigorous, high-scale, and regulated enterprises.

## Accelerate Time-to-Value

Our out-of-the-box next-generation agents with prebuilt skills and ability to ensure on-demand customizations free companies from the tyranny of tools and building agents by trial and error, which leads to delays in realizing value. Avaamo workplace agents are ready to deploy in weeks rather than months.

## Security and Compliance

The Agentic AI platform maintains Avaamo's well-known standards of data security and regulatory compliance, featuring advanced encryption, secure data handling, and stringent access controls to protect sensitive information.

## Availability

The newly unveiled Avaamo Workplace Agents are available immediately for organizations
