

# Collaboard Expands Self-Hosting Capabilities of Its On-Premises Online Whiteboard Solution

*Now Available for all Kubernetes Distributions and as a Virtual Appliance for VMWare, Proxmox, and Hyper-V*

ZURICH, SWITZERLAND, April 23, 2025 /EINPresswire.com/ -- [Collaboard](#), the Swiss provider of one of the secure [online whiteboard](#) solutions, today announced a major expansion of its self-hosting options for its on-premises platform. The solution is now compatible with all Kubernetes distributions and offered as a virtual appliance for VMWare, Proxmox, and, for the first time, Microsoft Hyper-V.

This makes Collaboard's secure, flexible collaboration platform more accessible to IT departments operating in highly controlled environments.

“

We understand the increasing need for privacy-focused digital tools that adapt to diverse infrastructures. With our expanded on-premises deployment options, we're meeting our clients needs”  
*Michael Görög, Co-Founder of Collaboard*

This enhancement allows public sector organizations, enterprises, and institutions with strict data governance policies to deploy Collaboard in the infrastructure of their choice - ensuring maximum data sovereignty, compliance with regional regulations, and seamless integration into existing IT environments.

Collaboard's on-premises version gives organizations complete control over access, data storage, and system configurations. By supporting a wide range of hosting options, the solution addresses a critical need among industries such as government, healthcare, finance, and education that require secure collaboration without relying

on external cloud providers.

New On-Premises Capabilities  
Include:

-Full Kubernetes Support: Deploy Collaboard on any Kubernetes distribution, including OpenShift, Rancher, and other platforms.

-Expanded Virtual Appliance Offering: Collaboard is now available as a ready-to-deploy virtual appliance for VMWare, Proxmox, and now also Microsoft Hyper-V, giving system administrators even more flexibility.

-Streamlined Setup: Improved documentation and automation options reduce deployment time and simplify maintenance.

-Increased Data Sovereignty: Host all data within your own infrastructure and align with GDPR, BSI, and other regulatory standards.

This release comes at a time when digital collaboration continues to play a crucial role in distributed and hybrid work models. With Collaboard's expanded deployment options, organizations can foster innovation and teamwork without compromising security. Collaboard is a global leader in [on-premises online whiteboard](#) technology.

The updated on-premises solution is available starting today. Interested organizations can schedule a personal consultation or request a trial environment.

#### About Collaboard

Collaboard is a Swiss-made online whiteboard solution developed by IBV Informatik AG. Designed for secure and creative collaboration, Collaboard enables teams to brainstorm, plan projects, and visualize ideas in real time. With a strong focus on data protection and compliance, Collaboard is trusted by public administrations, enterprises, and educational institutions across Europe. The platform offers flexible hosting options—including on-premises, private cloud, and sovereign cloud environments such as Open Telekom Cloud.

In addition, many certified local partners offer Collaboard as a managed service, operated directly in their regional data centers—providing organizations with even more flexibility and ensuring compliance with local data residency and sovereignty requirements.
