

Fasoo Highlights Strategic Approach to Enterprise AI, Security, and Data Infrastructure at FDI 2025

SEOUL, SOUTH KOREA, April 23, 2025 /EINPresswire.com/ -- [Fasoo](#), the leader in data-centric security, successfully held its annual flagship conference, the Fasoo Digital Intelligence 2025 Symposium (FDI 2025), on April 22 in Seoul, South Korea.

Themed “The GenAI Revolution: Enterprise AI Strategy”, this year’s event brought together IT and security leaders to explore the real-world implications of generative AI across data management, security, and governance.

“With the rapid evolution of GenAI and agent-based AI, organizations are facing new opportunities and challenges,” stated [Dr. Kyugon Cho, CEO of Fasoo](#). “Without clean, well-governed, and secure data, organizations face risks ranging from biased outcomes to data breaches. Our mission is to help enterprises establish the right data infrastructure for AI - without compromising security or compliance.”

The event opened with a keynote from Dr. Kyugon Cho, outlining the evolving AI landscape and key considerations for IT and security leaders. A subsequent session on Enterprise GenAI and LLM Agents explored the latest advancements in small large language models (sLLMs) and how enterprises can tailor these technologies to their own environments.

Breakout tracks provided deeper dives into topics like DSPM, security vulnerability assessment, supply chain risk, and the evolving landscape of OT/CPS security. The event concluded with a
