# Ex-Google Recruiter Launches AI Résumé Platform After Helping Job Seekers Land $165M+ in Offers

Former ML Recruitment lead at Unity and a two-time Google Peers Best Partner Award Winner

LOS ANGELES, CA, UNITED STATES, April 23, 2025 /EINPresswire.com/ -- After years of working alongside top engineers at Google, Apple, and Unity, and helping job seekers negotiate over $165 million in offers and equity, Kyler Frisbee is stepping out of the shadows with his most impactful product yet: CV3— an AI Agentics Recruitment Platform with its first tool, an AI-powered résumé rewriting platform that gives job seekers a real shot at landing interviews.

Frisbee, a former ML Recruitment lead at Unity and a two-time Google Peers Best Partner Award Winner, built CV3 as a solo founder using 15 different AI tools — without a team, without funding, and without shortcuts. His mission: to help overlooked talent finally get noticed.

> "
> CV3 takes everything I've learned from reviewing thousands of résumés and negotiating top-tier offers — and puts it in the hands of anyone looking for their next big opportunity."
>
> *Frisbee*

"I've seen too many talented people get ghosted because their résumé didn't reflect their worth," says Frisbee. "So I built a tool that rewrites their story — job by job — using AI. It's the resume upgrade I wish every candidate had."

 From Career Coaching to Career Code
Frisbee has spent the last decade inside the world's most competitive hiring pipelines — staffing leadership roles at companies like Google, Rivian, Unity, and Amazon. Through his personalized career coaching systems, he's helped engineers, designers, and product managers negotiate

over $165 million in salaries, equity, and job offers.

Now, with CV3 Elite, that playbook has been automated and scaled into an on-demand résumé engine that anyone can use — for as little as $5 per enhancement.

 What Makes CV3 Elite Unique
Built solo by a Google-trained technologist using 15 AI tools

Résumé rewrites in seconds — tailored to any job post

Live match scores to show how well your résumé fits

Used by early hires from Apple, Microsoft, Unity, Amazon, and Meta

 Built on Experience. Delivered by AI.
While most résumé platforms focus on templates and design, CV3 rewrites the actual content — line by line — to match job descriptions and pass ATS filters. It's powered by AI, but trained on real-world outcomes.
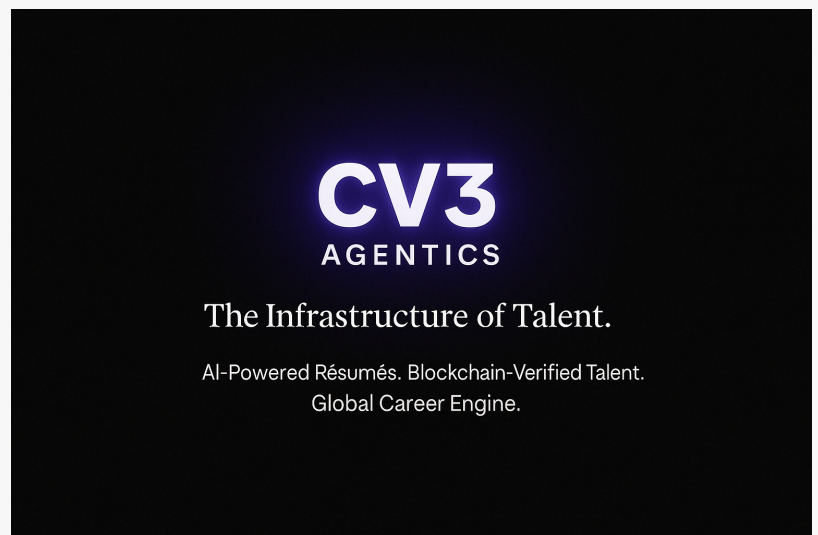

"CV3 takes everything I've learned from reviewing thousands of résumés and negotiating top-tier offers — and puts it in the hands of anyone looking for their next big opportunity."
