

TEW Design Studio Debuts TEWlines: Locally Made Furniture Infused with Palestinian Heritage and Sustainability

Local production ensures exemption from recent tariffs and helps redefine what it means to decorate consciously

APEX, NC, UNITED STATES, April 24, 2025 /EINPresswire.com/ -- [TEW Design Studio](https://www.einpresswire.com/2025/04/24/tew-design-studio) proudly announces the launch of [TEWlines Custom Furniture](https://www.tewlines.com/), a distinctive furniture collection that seamlessly blends sustainable sourcing, local craftsmanship, and Palestinian-inspired design. TEWlines offers homeowners customizable, high-quality pieces that reflect personal style while honoring traditional artistry.

TEWlines Custom Furniture Rima Nasser

Created by interior designer Rima Nasser, TEWlines was born from a vision to bring meaningful craftsmanship back into home design. With local production at its core, each piece supports the regional economy and skips the price hikes currently affecting much of the furniture industry. By investing in TEWlines, customers support North Carolina artisans and environmentally conscious practices.

“

We wanted to create a furniture line that tells a story—TEWlines is not just about style, but about heritage, sustainability, and local impact.”

Rima Nasser

What Makes TEWlines Stand Out:

- **Tariff-Free & Locally Made:** Produced in North Carolina, TEWlines is not subject to the rising costs of imported furniture—making high-quality design more accessible.
- **Cultural Craftsmanship:** Designs are inspired by Palestinian motifs and narratives, resulting in pieces that are rich in symbolism and soul.
- **Sustainable by Design:** Materials like Hempwood—a durable, carbon-negative alternative to traditional

hardwood—make sustainability stylish and structural.

- Fully Customizable: From nightstands to writing desks, each piece is made to order, allowing clients to select dimensions, finishes, and more.

TEWlines launches with three curated collections—A//C, F//P, and W//N—each tailored to a different functional need and design preference.
