# Feroot Launches AlphaPrivacy AI: Automating Global Privacy Compliance for Websites and Web Applications

AlphaPrivacy AI platform ensures compliance with GDPR, CCPA, HIPAA, and more, reducing compliance costs by up to 99.9%

TORONTO, ONTARIO, CANADA, April 28, 2025 /EINPresswire.com/ -- Feroot Security, a leader in web application security and compliance, today announced the launch of AlphaPrivacy AI, an AI-powered platform designed to automate privacy compliance for enterprise websites and web applications. In an era where privacy regulations are proliferating globally, organizations face significant challenges in maintaining compliance. Manual processes are time-consuming, error-prone, and costly, often requiring substantial resources to manage.

Feroot AlphaPrivacy AI addresses these challenges by leveraging AI to automate compliance tasks. It's powered by the same AI engine that recently made headlines for identifying hidden code embedded in DeepSeek's web login page, directly linking it to China Mobile, a state-owned telecom designated as a Chinese military company by the U.S. Department of Defense. AlphaPrivacy AI provides continuous monitoring, real-time insights, and automated remediation, ensuring that websites and web applications remain compliant with over 30 privacy standards, including GDPR (Europe), CCPA/CPRA (USA), HIPAA (USA), PIPEDA (Canada), Australian Privacy Principles, UK DPA/UK GDPR, and many more.

Key features of AlphaPrivacy AI include:
• Automated Compliance Monitoring: Real-time scanning for compliance with privacy laws.
• Single Source of Truth Database: Centralized compliance data for audits and reporting.
• Cross-Border Compliance: Manages data transfers across jurisdictions.
• Automated Remediation: Instantly fixes privacy violations.

"

• Comprehensive Reporting: Generates automated compliance records and audit trails.
• Enterprise Scalability: Designed for large-scale enterprises with multiple web properties across the globe.
• Multi-Jurisdiction Compliance Management: Covers a wide range of global privacy laws.
• Control of Third-Party Products and Scripts: Prevents unauthorized data sharing with third parties.
• Automated Policy Enforcement: Actively enforces privacy rules in real time.

• GRC AI Automation Suite: Streamlines governance, risk, and compliance assessment and reporting.

The platform delivers significant benefits, including:
• Time Savings: Tasks that previously took three months can now be completed in 45 seconds.
• Cost Reduction: Eliminates manual audits and reduces overhead costs by up to 99.9%
• Risk Management: Minimizes the risk of fines and data breaches.
• Enhanced Trust: Builds consumer confidence in data protection.

AlphaPrivacy AI is ideal for industries handling sensitive data, such as financial services, healthcare, e-commerce, SaaS, entertainment and more. The cloud-based platform can be quickly deployed with minimal disruption, and Feroot provides fully assisted implementation to get organizations up and running swiftly. It seamlessly integrates with existing security stacks, including SIEM systems, supports headless operation via API, and SSO for enterprise environments.

AlphaPrivacy AI is ideal for industries handling sensitive data, such as financial services, healthcare, e-commerce, SaaS, entertainment and more.
