

MDLifespan Expands to Michigan with New PlasmaXchange Location in Bloomfield Hills

BLOOMFIELD HILLS, MI, UNITED STATES, April 28, 2025

/EINPresswire.com/ -- MDLifespan, the nation's first physician-led brand dedicated exclusively to toxin removal and regenerative wellness, is proud to announce the opening of its newest PlasmaXchange location at 1900 S. Telegraph Rd., Suite 102, Bloomfield Hills, MI 48302.

This marks a major milestone in MDLifespan's national expansion, as the company proudly partners with its first woman-owned and operated compounding pharmacy—serving as a beacon of personalized care, innovation, and leadership in preventive health.

The Bloomfield Hills location brings MDLifespan's patented PlasmaXchange Protocol to Southeast Michigan, empowering local residents, patients, and practitioners with a cutting-edge approach to detoxification and long-term wellness.

“

Detroit has a proud legacy of industry and innovation, but it's also a region where toxin exposure can silently erode health. That's why this partnership with Physicians Compounding is so timely.”

Dr. Paul Savage, founder and CEO of MDLifespan

Why Detoxification Matters in the Detroit Area

From decades of auto-industry emissions to heavy metal contamination in drinking water, Metro Detroit residents face significant environmental health challenges. Studies show elevated levels of lead, PFAS, airborne industrial pollutants, mycotoxins and microplastics in the

region—many of which are linked to fatigue, hormonal disruption, neurological issues, and increased cancer risk.

“Detroit has a proud legacy of industry and innovation—but it’s also a region where toxin exposure can silently erode health over time,” said [Dr. Paul Savage](#), Chief Medical Officer at MDLifespan. “That’s why this partnership with Physicians Compounding is so timely—we’re offering a modern solution to an urgent regional problem.”

What Is PlasmaXchange?

PlasmaXchange is MDLifespan’s proprietary evolution of therapeutic plasma exchange (TPE)—a safe, hospital-grade procedure that’s been reimaged for wellness. This personalized protocol combines TPE with biomarker testing, IV nutrients, and regenerative therapies to support the body’s ability to detox, heal, and thrive.

Think of it as an “oil change for your bloodstream”—clearing out harmful debris and restoring optimal function at the cellular level.

What are Patients Saying: My brain fog has lifted, and I haven’t been sick in over a year

“My immune system feels stronger than ever, my brain fog has lifted, and I haven’t been sick in over a year. Knowing I could actually remove dangerous toxins—things that may have led to cancer or dementia—from my body was incredibly empowering. The MDLifespan Protocol didn’t just restore my health, it gave me confidence and clarity so I can truly enjoy life again.”

– Lisa Sullivan, MDLifespan Toxin Protocol Patient

MDLifespan Protocols Now Available in Bloomfield Hills

Patients can now access the full suite of PlasmaXchange protocols:

- MDL Brain – Cognitive clarity and neuroprotection
- MDL Heart – Cardiovascular and inflammation health

The infographic displays eight MDLifespan protocols arranged in a 2x4 grid. Each protocol is represented by a grey box with a white icon and text. The background features a city skyline. The protocols are:

- MDL BASIC**: A stand-alone session for those patients wanting a TPE procedure only.
- MDL TOXIN**: Aims to reduce toxins, including heavy metals, pesticides, herbicides, PFAs, microplastics, mycotoxins, and more as part of MDLifespan's focus on personalized toxin removal.
- MDL CANCER**: May improve the microenvironment of your cells, supporting immune strength and resilience.
- MDL IMMUNITY**: Aims to reboot and strengthen the immune system by addressing immune stressors such as toxins.
- MDL BABY**: Aims to reduce toxin levels in mothers, which may lead to fewer toxins being passed to the baby.
- MDL LONGEVITY**: Supports current health by reducing inflammation and oxidative stress, promoting long-term vitality, and significantly improving the biomarkers of aging.
- MDL HEART**: Helps reduce toxins, supports inflammation reduction, and designed to promote improved cardiovascular health.
- MDL BRAIN**: Helps reduce toxins and supports cognitive health through regenerative programs, enhancing mental clarity and resilience.

PlasmaXchange is MDLifespan’s proprietary evolution of therapeutic plasma exchange (TPE)—a safe, hospital-grade procedure that’s been reimaged for wellness. This personalized protocol combines TPE with biomarker testing, IV nutrients, and regenerative therapies to support the body’s ability to detox, heal, and thrive.

- MDL Immunity – Chronic illness and immune resilience
- MDL Longevity – Anti-aging and regenerative support
- MDL Toxin – Comprehensive detox for modern living
- MDL Baby – Pre-pregnancy detox for maternal health
- MDL Cancer – Inflammation reduction for cancer prevention
- MDL Basic – Foundational health reset

Free physician consultations are now available for patients and practitioners interested in evaluating their toxic burden and identifying the right protocol.

The MDLifespan TPE Difference

MDLifespan stands apart as the only national brand focused exclusively on TPE for wellness. Highlights include:

- Backing from Morsani College of Medicine
- Over 100 years of combined medical expertise
- 300+ TPE procedures performed in the past year
- Patent-pending protocols developed for root-cause detoxification
- Mobile app for biomarker tracking and progress monitoring
- Certified physicians and RNs guiding every step

Each protocol follows a 3D framework: Data (toxin testing), Disease (targeted inflammation reduction), and Decision (personalized treatment path).

About MDLifespan

Founded by Dr. Paul Savage and supported by a nationally renowned team of physicians including Dr. Pamela W. Smith and Dr. Edwin Lee, MDLifespan is the only practice solely dedicated to TPE for health optimization. With over 300 procedures performed in the past year alone, the team continues to push the boundaries of what's possible in regenerative medicine.
