

PawBehave Unveils Groundbreaking Variable Ultrasonic Dog Trainer and Pest Repeller

PawBehave launches the world's first adjustable ultrasonic dog trainer and pest repeller, offering humane, customizable training and pest control.

WILMINGTON, DE, UNITED STATES, April 28, 2025 /EINPresswire.com/ -- [PawBehave](#), a pioneer in pet behavior solutions, proudly announces the launch of the PawBehave Variable [Dog Bark Deterrent](#) — a revolutionary device redefining how pet owners train, communicate with their dogs, and protect their homes from unwanted pests.

The World's First Adjustable Ultrasonic Dog Trainer

Unlike traditional single-frequency bark deterrents, the PawBehave Variable Dog Bark Deterrent introduces a 10-level adjustable ultrasonic technology ranging from 21kHz to 30kHz. This innovation ensures a customized training experience, addressing the fact that no two dogs are alike.

PawBehave's flexible frequency system allows pet owners to fine-tune ultrasonic output, solving the common challenge where fixed-frequency devices fail to work on all dogs.

Range = **35 FT**

Hands-Free Pest Repeller

[Ultrasonic dog training](#) has historical roots dating back to 1876, when Francis Galton invented the silent dog whistle, capitalizing on dogs' ability to hear frequencies humans cannot. Humans

typically hear sounds between 20Hz and 20kHz, while dogs are sensitive to frequencies around 25kHz. Recognizing that dogs respond differently across the 21kHz to 30kHz range, PawBehave engineers developed a Variable Ultrasonic Trainer—expanding the device's effectiveness far beyond the 20–30% success rate of traditional single-frequency products.

Innovative Hands-Free Pest Repeller

Beyond training, the device doubles as an effective hands-free pest repeller. In the United States, homeowners often struggle with squirrels, rats, raccoons, and rabbits invading spaces like attics, garages, and basements.

Traditionally, pest control methods involve trapping or chemical deterrents. With PawBehave's hands-free mode, residents can strategically place the device where pests are active. The continuous ultrasonic output helps repel small animals humanely and effectively—offering a safe, maintenance-free alternative to conventional pest control methods.

E-Whistle and Strobe Light Features

Further enhancing versatility, PawBehave includes 18 different E-Whistle sounds to better capture a dog's attention during training sessions. Whether for recall training, obedience reinforcement, or behavioral correction, users have a wider range of sound options to suit their pet's specific needs.

In addition, a powerful 1000-lumen flashlight and strobe mode are built in, ideal for nighttime walks or visual deterrence during training or pest control situations.

Designed for Safety, Portability, and Effectiveness

PawBehave is thoughtfully designed with safety, portability, and ease of use in mind. The device is lightweight, USB rechargeable, and suitable for both home and outdoor use. Offering a humane, non-invasive alternative to shock collars and chemical deterrents, PawBehave empowers pet owners and homeowners alike with smarter solutions for everyday challenges.

About PawBehave

PawBehave has been a trusted innovator for decades, providing smart, humane, and effective solutions for modern pet owners and American households. Committed to animal welfare and technological innovation, PawBehave products are recognized globally for promoting safe, stress-free training and ethical pest management.
