

# Creative BioMart's Monthly Special Release Continues to Spark Enthusiasm Across the Research Community

*Creative BioMart is delighted to announce the ongoing success of its Monthly Special Release program that offering up to 50% off for some protein products.*

SHIRLEY, NY, UNITED STATES, April 29, 2025 /EINPresswire.com/ -- Creative BioMart, one of the world's leading supplier of [recombinant protein products](#) and cutting-edge research tools, is delighted to announce the ongoing success of its Monthly Special Release program that offering up to 50% off for some popular or commonly used protein products.

Started from a small supplier with the development and production of recombinant protein products, Creative BioMart now offers over 100,000 protein products covering native proteins, GMP proteins, lysates, chromatography reagents, assay kits, detection kits, and various related services including protein expression, protein labeling, protein interaction, [protein engineering](#), and protein characterization, ensuring customers receive continuous support for their research.

Since its launch in July, 2024, this Monthly Special Release program at Creative BioMart has garnered overwhelming support from researchers and scientists worldwide, offering exclusive discounts of up to 50% off on a selection of high-demand products each month.

The Monthly Special Release program continues to provide outstanding value by offering a rotating selection of popular and trendy items at incomparable pricing. Every month, shoppers can find new savings on everything from common lab reagents to revolutionary technologies highlighted in recent scientific publications. This dynamic method ensures that researchers always have access to the most recent tools at a reasonable cost.

Some of the discounted products at Creative BioMart this month include:

Active Recombinant Mouse Angpt2 Protein, C-6×His tagged

Active Recombinant Mouse Interleukin 23 Receptor, Fc-tagged

Active Recombinant Human K (lysine) Acetyltransferase 2B

Active Recombinant Mouse klotho protein, His-tagged  
Active Recombinant Human Lymphotoxin Alpha (TNF Superfamily, Member 1)  
Active Recombinant Human MIF  
Active Recombinant Human MSLN Protein, Fc-tagged  
[Recombinant Human EGF Protein](#)  
Recombinant Human IGF1 protein  
...

"We are delighted to see the growing enthusiasm around our Monthly Special Release," said Linna, the chief marketing staff at Creative BioMart. "Whether you are searching for a classic favorite or looking to try something new, you'll find outstanding options every month."

Participation is simple—customers can visit Creative BioMart's website to explore the monthly offers and enjoy easy access to premium research materials at reduced rates. In addition, by subscribing to Creative BioMart's newsletter, researchers gain early access to exclusive deals, product updates, and previews of upcoming monthly features.

"Sharing is caring. We also encourage our customers to spread the word and bring their peers into the loop. At Creative BioMart, fostering strong relationships and supporting scientific advancements is at the heart of what we do." added Linna.
