

EQTEMP BRINGS AFFORDABLE REFRIGERATION TO HEALTHCARE SPACES

Felix Storch, Inc. Expands Its Selection of Pharmaceutical Cold Storage With New Brand For Budget-Conscious Facilities

BRONX, NY, UNITED STATES, May 13, 2025 /EINPresswire.com/ -- Felix Storch, Inc. (FSI), known for serving medical and life science cold storage needs through its [Accucold division](#), has launched a new brand specifically for the healthcare industry. Available in multiple sizes, the [new line of EQTemp cold storage](#) is designed to bring temperature stability to budget-conscious facilities including medical offices, health departments, and pharmacies.

EQTemp Refrigeration Series

“

The EQTemp line is thoughtfully designed for the kind of healthcare facility that requires stabilized temperature on a more limited budget.”

Paul Storch

Temperature excursions can negatively impact the viability of not only vaccines but also other goods, such as testing reagents, topical preparations, and specific pharmaceuticals. Choosing the right refrigerators that have been purpose-built for the application is extremely important. The EQTemp lineup features glass and solid door refrigerators from 1 to 16 cu.ft. in size, all designed and tested to ensure convenient and reliable cold storage without some of the more advanced features used in laboratory storage.

Every EQTemp model features a user-friendly, intelligent microprocessor digital temperature controller that keeps the current and high/low temperatures viewable without opening the door. The magnetic door gasket, audible temperature and open door alarms, self-closing door, and internal fans enhance the reliability, while the factory-installed lock and hospital-grade plug ensure added safety and protection. Each EQTemp unit is equipped with an access port for facility managers to add their own additional monitoring equipment if needed.

"We're proud to expand our healthcare selection with a product line that meets strict CDC guidelines while still offering an intuitive interface for easy staff use," says Paul Storch, President of FSI. "These units have been thoughtfully designed for the kind of healthcare facility that requires stabilized temperature on a more limited budget."

EQTemp Refrigeration, in medical office setting

[The EQTemp brand](#) includes units that are certified to the NSF/ANSI 456

Vaccine Storage Standard, with the temperature monitoring device (TMD) calibrated to NIST standards in their in-house ISO/IEC 17025:2017 certified laboratory. All products are available through an extensive network of appliance dealers and medical equipment distributors. For more information, visit eqtemp.com or call 718-893-3900.
