Alice's Psychiatry & Wellness Launches to Deliver Expert, Inclusive Mental Health Care in Georgia and 6 Other States

LILBURN, GA, UNITED STATES, April 29, 2025 /EINPresswire.com/ -- Alice's Psychiatry & Wellness is proud to announce its official launch, bringing compassionate, individualized psychiatric care to adults across Georgia and several other states through in-person and telepsychiatry services. Founded by board-certified Psychiatric Mental Health Nurse Practitioner Omoye Ehizuelen, the clinic is on a mission to make highquality mental health care more accessible, inclusive, and attuned to the unique needs of every client.

"We're incredibly grateful for the

outpouring of encouragement and support we've received," said founder Omoye Ehizuelen. "This is just the beginning, and we're excited to grow with our community, providing expert care that empowers people to take charge of their mental wellness."

Alice's Psychiatry & Wellness offers a broad spectrum of psychiatric services, including psychiatric evaluations, medication management, psychotherapy, and telepsychiatry for clients in Georgia, Maryland, Delaware, Washington, Iowa, New Mexico, and Colorado. In-person appointments are available by request for residents of Georgia.

With a deep understanding that mental health is not one-size-fits-all, the clinic stands out by providing personalized treatment plans supported by pharmacogenetic testing—an advanced tool that uses a patient's genetic profile to tailor medication choices for greater effectiveness and

fewer side effects.

A Personalized, Human-Centered Approach

What truly sets Alice's Psychiatry & Wellness apart is its continuity of care. Clients work with the same provider throughout their treatment journey, ensuring trust, familiarity, and a deeper understanding of each person's evolving needs.

"Too often, clients feel like they're being passed from one provider to another," said Ehizuelen. "We believe that healing happens in the context of consistent, trusting relationships. That's why we prioritize long-term care with a provider who knows your story."

Bridging Gaps with Telepsychiatry

To expand access to care, Alice's Psychiatry & Wellness offers virtual services for clients in multiple states. This approach meets the needs of those with mobility limitations, transportation challenges, or busy schedules, while still providing high-quality, HIPAA-compliant psychiatric care

from the comfort of home.
