

The Pivot Master Solution Brings Energy-Efficient Irrigation to Farmers in Africa

New standard in sustainable agriculture with the Pivot Master Solution, an innovative irrigation system that transforms the way farmers power pivot irrigation.

GEORGE, WESTERN CAPE, SOUTH AFRICA, April 30, 2025

/EINPresswire.com/ -- Tripple Hydro & Energy is setting a new standard in sustainable agriculture with the launch of the [Pivot Master](#) Solution, an innovative irrigation system that

promises to transform the way farmers power and manage their pivot irrigation. With a focus on energy efficiency, reliability, and cost reduction, the Pivot Master Solution is the ultimate game-changer for farms looking to embrace renewable energy.

The Future of Sustainable Irrigation

The Pivot Master Solution combines cutting-edge solar technology with intelligent synchronization to deliver a system that operates entirely off-grid or in a hybrid setup. Featuring the Pivot Master Power Supply and the groundbreaking Pivot Master Sync Controller, this solution seamlessly integrates solar energy to power pivot systems and irrigation pumps.

Unlike traditional systems that require expensive batteries and inverters, the Pivot Master eliminates unnecessary components by synchronizing power flow directly from solar arrays to the equipment. This means farmers can achieve reliable daytime irrigation without the added cost of energy storage.

Key Features of the Pivot Master Solution:

- **Solar-Powered Precision:** Operates entirely on solar energy, significantly reducing reliance on grid power or diesel generators.
- **Pivot & Pump Synchronization:** Ensures seamless operation between the pivot and pump, optimizing performance and energy usage.
- **Scalable for Any Farm:** Customizable for 1 to 15 towers and adaptable to any pivot brand

operating on 380-400V electrical motors.

- No Batteries Required: The system's innovative design prioritizes cost-effectiveness by eliminating the need for battery backup.
- Capacitor Bank for Stability: Handles inrush currents and ensures smooth operation, even in challenging conditions.

Why It Matters

With rising energy costs and an urgent need for sustainable farming practices, the Pivot Master Solution is the answer to farmers' growing concerns. By reducing energy consumption and enabling off-grid operation, this system not only saves money but also contributes to a greener, more sustainable future for agriculture.

"We developed the Pivot Master Solution with the modern farmer in mind," said Hannes Moolman, Chief Executive Officer of Tripple Hydro & Energy. "This isn't just an irrigation system – it's a commitment to empowering farmers with technology that's efficient, cost-effective, and environmentally friendly. The Pivot Master is more than a product; it's a movement towards sustainable farming."

See It in Action

Experience the Pivot Master Solution firsthand with our exclusive demonstration video, showcasing how this revolutionary system works. Visit our website or contact our sales team to learn more.
