

# VoiceScript, Inc. Launches AutoScriptOne: The Future of Court Reporting Has Arrived

---

STUART, FL, UNITED STATES, May 1, 2025 /EINPresswire.com/ -- VoiceScript, Inc., a leader in legal technology innovation, today announced the official launch of AutoScriptOne, the first fully automated real-time AI editing platform built specifically for court reporters, agencies, and courts. AutoScriptOne enables legal professionals to deliver high-quality, client-ready rough transcripts in real time - while dramatically reducing turnaround times and costs for production of certified transcripts.

AutoScriptOne empowers digital, voice, and stenographic reporters to edit proceedings live, whether remote or in-person, using powerful AI-driven tools. Reporters can now deliver client-ready roughs within minutes after a proceeding and produce certified transcripts three to five times faster than traditional methods.

"AutoScriptOne is more than just a productivity tool - it's a major turning point for the court reporting industry," said Rene Arvin, CEO of VoiceScript. "We're enabling reporters and agencies to deliver more accurate work faster and with far less effort, while enhancing services provided to legal clients."

AutoScriptOne supports Zoom, Teams, WebEx, and in-person recording, making it ideal for freelancers, small to large agencies, and courts alike.

"AutoScriptOne has truly changed my life," said Emily Rivera, a New York based court reporter. "I can now take on more than double the work I could have managed previously - and still enjoy more time with my family."

AutoScriptOne is available immediately. To schedule a private demo or start a free trial, visit [www.AutoScript.ai](http://www.AutoScript.ai) or contact VoiceScript at [contact@voicescript.ai](mailto:contact@voicescript.ai).
