

St. Louis Circuit Court Enhances Visitor Experience with Digital Directory Powered by Interactive Touchscreen Solutions

The 22nd Judicial Circuit Court of Missouri has installed a new digital directory system developed in partnership with Interactive Touchscreen Solutions, Inc.

ST. LOUIS, MO, UNITED STATES, April 30, 2025 /EINPresswire.com/ -- The Twenty-Second Judicial Circuit Court of Missouri, serving the City of St. Louis, has announced the installation of a new digital directory system at their

two downtown courthouses, the Clyde S. Cahill Courts Building and the Mel Carnahan [Courthouse](#), delivering a more modern and efficient experience for visitors and staff.

The newly implemented system was developed in partnership with Interactive Touchscreen Solutions, Inc., the creator of Navigo® [digital signage](#) software. Designed to streamline navigation and reduce confusion, the digital directory provides real-time information about courtroom locations, schedules, and department listings.

“ We're proud to support the St. Louis Circuit Court with a system that not only looks great but also makes a real difference for daily visitors.”
Natalie Bobila, VP Sales and Marketing

This project is part of a broader initiative to improve accessibility and visitor engagement within the buildings. The new digital directory enables guests to quickly locate courtrooms and offices using a large touchscreen interface, enhancing both clarity and convenience.

Interactive Touchscreen Solutions, Inc., based in Maryland, has been a trusted developer of interactive digital signage and directory systems for over 20 years. Their Navigo® platform is widely used in courthouses, government buildings, commercial real estate, and healthcare facilities across the country.

"We're proud to support the St. Louis Circuit Court with a system that not only looks great but also makes a real difference for daily visitors," said, VP of Sales and Marketing, Natalie Bobila, for Interactive Touchscreen Solutions. "Navigo® was built to simplify complex spaces, and this installation does exactly that."
