

# This Week in Construction: Top Innovations & Industry Trends – April 30, 2025

*Peer-to-peer digital content sharing for construction and building professionals*

SUNDRE, ALBERTA, CANADA, April 30, 2025 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

This week's featured video from Keller Group offers a detailed 3D animation of Continuous Flight Auger (CFA) Piling, also known as Augered Cast-In-Place (ACIP) piling. Ideal for urban construction and sensitive environments, CFA piles provide a low-noise, vibration-free solution for structural support, earth retention, landslide prevention, and infrastructure projects. The process involves drilling with a hollow stem auger, pumping concrete or grout under pressure as the auger is withdrawn, then placing reinforcement into the wet concrete. Keller's CFA piles are typically reinforced with six-metre cages, with the ability to install longer as needed. This method is efficient and adaptable to various soil conditions, achieving depths over 30 metres with diameters from 300 mm to 1000 mm. With no need for temporary casing, installation is fast and cost-effective. Keller enhances quality assurance through advanced instrumentation on all rigs,

monitoring key variables and generating detailed logs for each pile. A robust Quality Management System and non-destructive testing ensure integrity and performance, making CFA piling a reliable choice for complex, high-demand construction environments. Watch the full video to see how this technology is transforming modern foundation systems.

Featured content published this week includes a range of topical subjects:
