

# Learn Look Locate, Pfizer & Imerman Angels Launch Global Initiative to Expand Access to Stage 4 Breast Cancer Advances

*Delivering Cutting-Edge Treatment Insights and One-on-One Mentor Support for Metastatic Breast Cancer Patients Worldwide*

TUCSON, AZ, UNITED STATES, May 6, 2025 /EINPresswire.com/ -- Learn Look Locate (LLL), the leading global platform for trusted, medically vetted breast cancer education, has partnered with Pfizer and Imerman Angels to launch a global initiative ensuring patients worldwide have timely access to the latest advances in Stage 4 breast cancer treatment.

Metastatic breast cancer, or Stage 4 breast cancer, remains a major health challenge. In the United States alone, over 168,000 people are currently living with this advanced diagnosis. Worldwide, patients often face fragmented information and limited access to trusted, personalized resources.

Powering this groundbreaking initiative is the newly released [Comprehensive Guide to Stage 4 Breast Cancer](#), created with expert content from Dr. Ramji Rajendran, Radiation Oncologist and LLL Medical Advisor, and Dr. Rahul Singh, Medical Oncologist and LLL Medical Advisor. The resource delivers clear, medically reviewed information on advanced therapies, including chemotherapy and emerging radiopharmaceuticals—critical options in the treatment of Stage 4 breast cancer. It also reinforces the importance of coordinated multidisciplinary care to help patients navigate complex decisions.

Learn Look Locate, Pfizer, and Imerman Angels Launch Global Initiative to Ensure Patients Worldwide Have Timely Access to the Latest Advances in Stage 4 Breast Cancer Treatment

Recognizing the critical need for emotional support in Stage 4 breast cancer, Learn Look Locate and Pfizer have partnered with Imerman Angels to offer free, international, one-on-one mentor support. Through a unique pairing system, Imerman Angels connects patients with trained survivor mentors who understand the emotional challenges of metastatic disease, ensuring no one faces cancer alone.

“With Stage IV breast cancer, it is important that patients feel that all their physicians are in good communication with each other. There are many ways to treat patients, and multidisciplinary care is essential,” said Dr. Ramji Rajendran, Radiation Oncologist and LLL Advisor.

#### Advances in Chemotherapy for Stage 4 Breast Cancer

Chemotherapy remains a cornerstone of treatment for Stage 4 breast cancer. Its ability to target cancer cells throughout the body makes it essential for controlling symptoms, shrinking tumors, and improving quality of life.

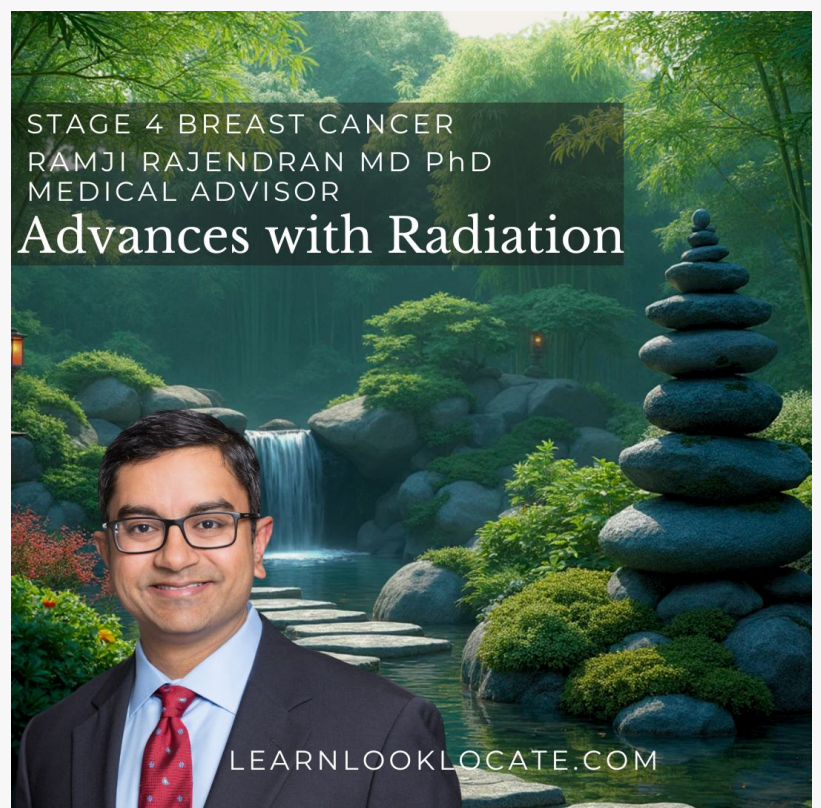

“When you’re facing Stage IV breast cancer, understanding your treatment options is critical,” said Dr. Rahul Singh, Medical Oncologist and LLL Advisor. “Chemotherapy continues to play a central role, especially when the cancer has spread beyond the breast. My goal is always to help patients understand what’s driving their cancer, and how we can use the latest advances to slow its progress and maintain quality of life.”

#### Expanding Global Access

To extend the reach of this resource, Learn Look Locate’s Stage 4 Comprehensive Guide is also featured on [Pfizer’s This Is Living With Cancer™ platform](#), alongside LLL’s [vital patient](#) resources on Pathology and Chemotherapy. These trusted resources deliver essential knowledge across the breast cancer journey, ensuring LLL’s medical insights reach a global audience.

#### A Unified Mission for Patient Empowerment

Together, Learn Look Locate, Pfizer, and Imerman Angels are building a stronger support

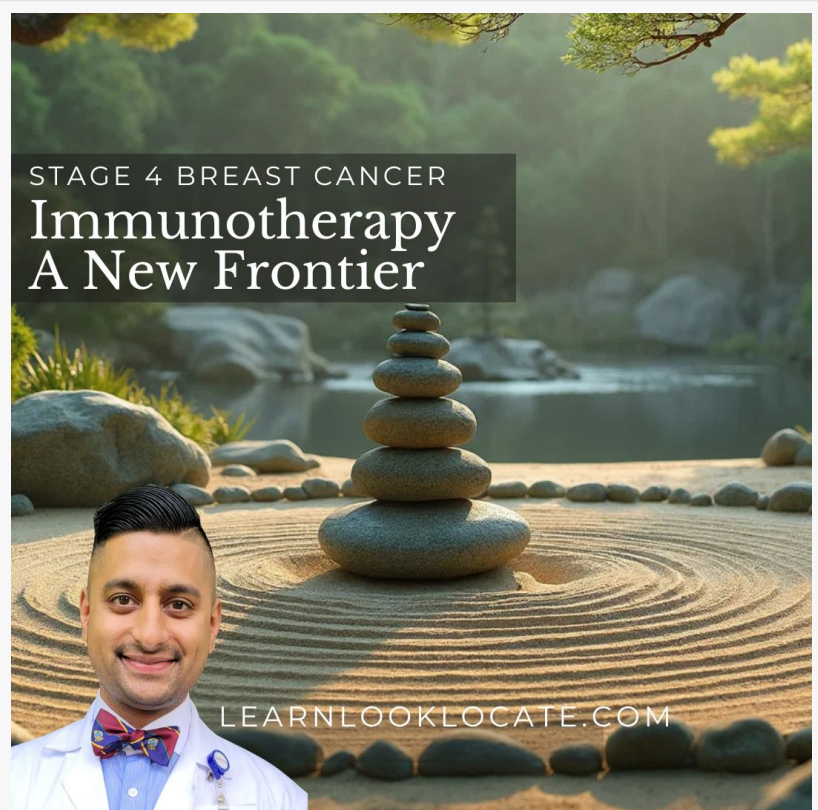

“With Stage IV breast cancer, it is important that patients feel that all their physicians are in good communication with each other. There are many ways to treat patients, and multidisciplinary care is essential”

network for people facing Stage 4 breast cancer. Each partner brings essential strengths: Learn Look Locate delivers expert-vetted education; Pfizer amplifies it globally via its This Is Living With Cancer™ platform; and Imerman Angels provides personalized, free mentor support.

About Learn Look Locate (LLL)

Learn Look Locate (LLL) is a global breast cancer education platform founded by survivor Cynthia Jordan following her own Stage 2B diagnosis. With a mission to simplify the complex, LLL delivers medically vetted content, survivor-driven insights, and expert guidance to empower patients worldwide. Collaborating with over 20 top breast cancer specialists across radiology, oncology, surgery, and genetics, LLL bridges the gap between clinical expertise and real-world patient experience. By uniting medical leaders and survivor voices, LLL is redefining how people understand, navigate, and advocate through every stage of breast cancer.

Immunotherapy has emerged as an important treatment option for certain types of Stage 4 breast cancer, particularly triple-negative breast cancer. This innovative approach harnesses your body's immune system to fight cancer cells.
