

Compact Living Delivers Tiny Homes on Wheels That Are ANSI Certified

LAS VEGAS, NV, UNITED STATES, May 1, 2025 /EINPresswire.com/ -- In the state of California, there are numerous jurisdictions that have approved moveable tiny homes as a legal Accessory Dwelling Unit (ADU) when placed in the backyard of an existing residential home. The permitting process is fairly streamlined, with minimal requirements for the tiny home placement including a requirement that the tiny home builder is ANSI certified by an approved third-party company. [Tiny Homes on Wheels](#) are inexpensive and can be manufactured quickly, allowing the homeowner to add the tiny home to their property in just a few months. Other states have recognized this option and are in the process of approving these homes for installation at existing residential properties. Stand-alone tiny home on wheels communities are also becoming popular, with affordable site rental rates for owners of third-party certified moveable tiny homes. Existing homeowners have also recognized this growing trend and are offering backyard space for the tiny home residents for a reasonable monthly rental rate.

Craftsman Model Tiny Home on Wheels
