

# ARISTON NUOS PLUS S2 WATER HEATER LAUNCHES IN THE MIDDLE EAST

DUBAI, UNITED ARAB EMIRATES, May 5, 2025 /EINPresswire.com/ --

ARISTON, a leading global manufacturer of water heaters, has officially launched its latest innovation, the NUOS PLUS S2, in the Middle East. This sleek, modern water heater is designed to provide efficient, sustainable hot water solutions for homes and businesses. The NUOS PLUS S2 is a wall-mounted unit that offers a compact and stylish design, making it an ideal choice for modern interiors. It features advanced energy-saving technologies that reduce energy consumption and lower utility bills. The unit is also equipped with a smart control system that can be accessed via a mobile app, allowing users to monitor and control the water heater remotely. The NUOS PLUS S2 is available in various capacities to suit different household needs. For more information, visit [www.ariston.com](https://www.ariston.com).

Ariston Middle East is pleased to announce the launch of the new Ariston NUOS PLUS S2 water heaters. This new model is designed to provide efficient and reliable hot water supply for your home. The NUOS PLUS S2 is available in three different energy efficiency classes: Green (Green), Boost (Boost), and Holiday (Holiday). The Green model is the most energy-efficient, while the Boost model is designed for high-demand households. The Holiday model is designed for households that are away from home for long periods of time.

The NUOS PLUS S2 water heaters are available in a range of capacities from 40 to 100 litres. They are designed to be compact and easy to install. The Boost model is designed to provide a high flow rate of hot water, while the Holiday model is designed to provide a long hot water supply. The Green model is designed to provide the most energy-efficient hot water supply.

The NUOS PLUS S2 water heaters are designed to be easy to use and maintain. They feature a digital display and a remote control. The Boost model is designed to provide a high flow rate of hot water, while the Holiday model is designed to provide a long hot water supply. The Green model is designed to provide the most energy-efficient hot water supply.
