

# InventionHome® Product Developer Creates Innovative Portable Cooker that Brings Rotisserie-Style Cooking to the Road

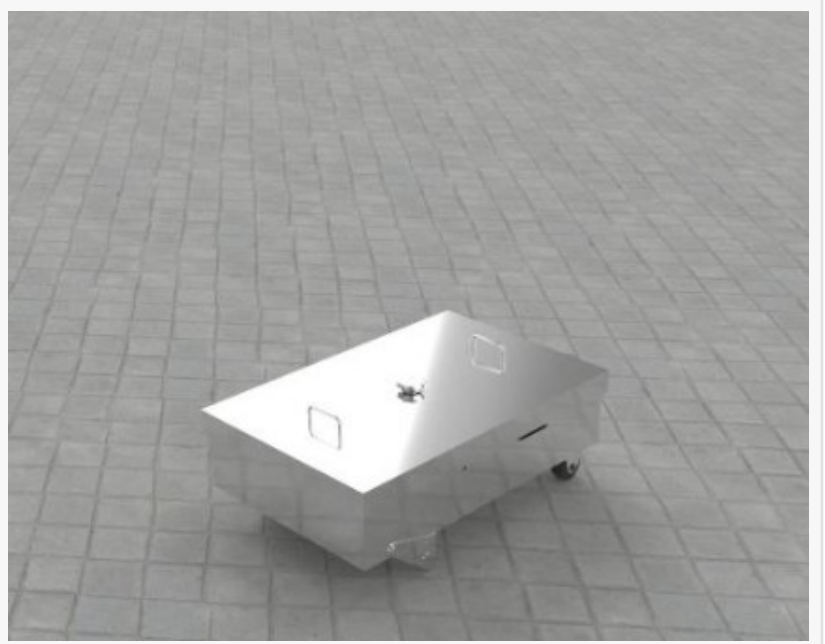

PITTSBURGH, PA, UNITED STATES, May 8, 2025 /EINPresswire.com/ -- An inventor from Wisconsin created the Compact Versatile Portable Cooker, an all-in-one rotisserie grill and cooking system designed for on-the-go culinary enthusiasts who refuse to compromise on flavor or functionality. Unlike traditional cookers and grills that are bulky, difficult to transport, and largely confined to home use, the Compact Versatile Portable Cooker is designed for mobility. The system folds down into a portable, suitcase-like configuration with integrated wheels and a pull handle, making it easy to take anywhere a vehicle can go.

The cooking system is perfect for tailgates, camping trips, graduation parties, and food truck services, offering an innovative and versatile solution for full rotisserie capabilities in a single compact unit. Once on site, users can quickly expand the unit to access a full-featured rotisserie and grill system. There is an internal rotating spit powered by either a hand crank or small electric motor. The design includes a fire pan, hinged front and back plates, and dual support racks to elevate the spit above the heat source. An optional grill surface and

gas burner add to the system's flexibility. The system ultimately functions as a convenient, portable grill where roasts, steaks, burgers, potatoes, and vegetables like corn on the cob can be prepared with ease.

Two charcoal storage units built into the base provide the classic flavor of fire-roasted food, while also enabling easy ash disposal after cooking. This thoughtful engineering ensures the system is as convenient to clean as it is to use. This cooker solves a real problem for outdoor chefs who love rotisserie cooking and grilling but hate the logistics of typical grilling units.

The Compact Versatile Portable Cooker is ideal for food truck operators needing on-site roasting capabilities, backyard chefs taking their talents to the tailgate or campground, party hosts looking to serve large groups with professional-grade tools, outdoor enthusiasts who want to bring the full cooking experience wherever they go, and many more. It could also be rented out for tailgating groups and offer a source of rental income for any outdoor sporting event or catering business. With its multipurpose design, ease of transport, and robust cooking features, the Compact Versatile Portable Cooker is set to become a must-have product for any manufacturer serious about expanding their outdoor cooking product lines.

The inventor was issued her Utility Patent from the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](https://www.inventionhome.com), a leading invention licensing firm, to sell or license the patent rights to her Compact Versatile Portable Cooker product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in the Compact Versatile Portable Cooker can contact InventionHome at [member@inventionhome.com](mailto:member@inventionhome.com). Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at [info@inventionhome.com](mailto:info@inventionhome.com) or by calling 1-866-844-6512.

About InventionHome®

InventionHome® is a top-rated invention marketing and product licensing company dedicated to

helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
