

Watch The European's interview with Gary Yohe on Extreme Weather and Adaptive Strategies

LONDON, UNITED KINGDOM, May 9, 2025 /EINPresswire.com/ -- Extreme weather events - such as heatwaves and flash floods - are inflicting a high cost on humanity, the environment, and financial structures. As the authorities in the United States recently battled to control wildfires in Los Angeles - among the worst in the state's history - the spotlight has again been thrown on climate change and ways to combat it...begging the question of whether a radical change of thinking is now required?

Juliette Foster spoke to Gary Yohe, Huffington Foundation Professor of Economics & Environmental Studies, Emeritus.
