

OPIC Technologies, Inc. Enhances Hotel Previews with Spatial Live Stream Technology

OPIC's Spatial Live Stream tech offers immersive hotel previews, showing rooms, amenities, and surroundings with depth and real-time context.

ORLANDO , FL, UNITED STATES, May 14, 2025 /EINPresswire.com/ -- OPIC

Technologies, Inc., the global leader in [Spatial Live Stream](#) Technology, is redefining how travelers explore

accommodations before booking. Through real-time, depth-rich livestreams, potential guests can now experience hotel rooms, amenities, and surrounding areas with spatial accuracy—offering a more realistic and informative view than traditional photos or flat video tours.

Choosing a hotel involves more than aesthetics—it's about understanding space, layout, and environment. OPIC's Spatial Live Stream technology allows hospitality brands to showcase their properties in a way that reflects how guests actually experience them. Viewers can observe the proportions of a suite, the openness of a pool area, or the walkability of a neighborhood—all in real time, from a three-dimensional perspective.

"Travelers want to know not just what a room looks like, but how it feels," said Bob Douglas, CEO of OPIC Technologies, Inc. "Spatial Live Stream Technology helps hotels build trust by giving potential guests a more complete and authentic view of the space."

Hotels can use the platform to conduct personalized virtual tours, answer live questions, or highlight newly renovated areas. The technology is also ideal for showcasing event venues, spas, dining areas, and outdoor features—all with spatial depth that enhances understanding and decision-making.

"This isn't just a marketing tool—it's a better way to communicate real value," Douglas added. "Guests are more confident in their choices when they can explore a property naturally and interactively."

Welcome to the OPIC*Verse

With hospitality trends increasingly driven by transparency, customization, and remote engagement, OPIC's technology provides hotels with a powerful tool to meet modern traveler expectations.

About OPIC Technologies, Inc.
