# Softstack Completes Smart Contract Audit of Fetch AI's Agentverse Launchpad, and Eliminates Risks

*Softstack audits Fetch AI's Agentverse launchpad, fixes key risks, and strengthens security for tokenized AI agents and bonding-curve sales.*

FLENSBURG, SCHLESWIG-HOLSTEIN, GERMANY, May 12, 2025 /EINPresswire.com/ -- Softstack, a leading Web3 security and service partner company, has finalised a comprehensive smart contract audit for Fetch AI's Agentverse Launchpad, reinforcing the platform's commitment

Fetch AI Smart Contract Audit by softstack

to secure token creation and AI powered agent economies. The independent reviewed every line of Solidity code that governs AgentCoin deployments, bonding curve sales, automated liquidity listing, and multisig governance. Auditors uncovered one high severity, one medium severity, and two low severity issues, none critical, which Fetch AI fixed promptly.

> " Security is a non negotiable pillar for autonomous agents. By partnering with Softstack, we're delivering a hardened launchpad where developers and traders can interact with confidence."
>
> *Humayun Sheikh, CEO of Fetch AI*

Key Highlights
Focus Area: Signature malleability in multisig
Remediation Outcome: Integrated OpenZeppelin ECDSA & signature-reuse protection (Fixed)

Focus Area: Arbitrary pricing divisor
Remediation Outcome: Parameterised & documented bonding-curve maths (Fixed)

Focus Area: Unlimited ERC-20 allowance
Remediation Outcome: Implemented time-bound, exact approvals (Fixed)

About Fetch AI

Fetch‑AI is building an open, decentralised machine‑to‑machine economy by fusing artificial intelligence, multi‑agent systems and blockchain. Its public ledger, $FET token and open‑source uAgents framework let developers create autonomous software agents that can discover, negotiate and transact without human intervention across industries such as mobility, supply‑chain, DeFi and smart energy. Agentverse a decentralised development, management and launch hub within the Fetch‑AI ecosystem extends this vision by enabling builders to mint, deploy and trade tokenised AI agents ("AgentCoins") via a transparent bonding‑curve launchpad, giving every agent its own micro‑economy and liquidity.

About Softstack

Founded in 2017, Softstack secures Web3 projects on Ethereum, Solana, Polygon, TON, and beyond. Safeguarding over $100 billion in user funds through rigorous code audits, penetration testing, and security consulting. Softstack is also known as Web3 service partner for software development and consulting.
