BPX assists other businesses in achieving the seamless integration of both UiPath Process Mining and Power Automate Process Mining in their business functions, ensuring smooth implementation and ROI-driven impact. These platforms do allow companies to: Have full visibility of their business processes, Automate the decision-making process and any workflow changes, Track performance in real time to improve productivity. Tailored to different needs, BPX provides consulting for process mining so as to ensure that no opportunity in any digital transformation initiative will be lost.

According to Nikhil Agarwal, the founder of BPX, "Having process mining technology enables a business to move away from reactive workflow management into a proactive way of management." Equipped with continuous AI-embedded insights thereafter, companies can optimize operations while remaining in front of the competition.

The inefficiencies brought about by manual labor and process gaps are an established brake on business growth. Process-mining technology provides a data-driven roadmap to optimize operations, ensuring workflows stay agile and efficient. By enabling real-time insights, businesses can ensure enhanced productivity, reduced risk, and improved customer satisfaction. Enabling organisations to continuously enhance their digital workflows is BPX's expertise in UiPath Process Mining and Power Automate Process Mining.

Rupal Agarwal, co-founder, said, "At BPX, we help organizations simplify complex digital workflows using process mining. Our expertise ensures businesses make data-based decisions to optimize efficiency and accelerate growth." Actively focused on [AI-Driven Process Mining](#), BPX enables future-ready digital workflows in business.

BPX is a

With over 12 years of experience in process consulting and BPM, BPX has empowered 500+ clients from 12 countries and across 21 industries with their process mining and process automation expertise.
