

Metal Insulator Semiconductor (MIS) Chip Capacitor Market Forecast: Key Growth Drivers, Trends, From 2025 To 2034

The Business Research Company's Metal Insulator Semiconductor (MIS) Chip Capacitor Global Market Report 2025 – Size, Trends, And Global Forecast 2025 To 2034

LONDON, GREATER LONDON, UNITED KINGDOM, May 13, 2025

/EINPresswire.com/ -- The [metal](#)

[insulator semiconductor mis chip capacitor market](#) has seen robust growth in recent years. The market size is projected to evolve from \$1.35 billion in 2024 to \$1.44 billion in 2025, marking a compound annual growth rate CAGR of 7.0%. This growth in the historic period can largely be linked to factors such as the rising demand for portable electronic devices, miniaturization of

electronic components, the expansion of the consumer electronics market, the need for high-performance capacitors, the rise in telecommunications infrastructure, advancements in automotive electronics, the demand for high-speed data transmission, and the expansion of renewable energy systems.

The Business Research Company's Latest Report Explores Market Driver, Trends, Regional Insights - Market Sizing & Forecasts Through 2034"

The Business Research Company

Is the Metal Insulator Semiconductor Market Set to Witness Substantial Growth?

The [MIS chip capacitor market](#) is expected to see robust

growth in the next few years, rising to an impressive \$1.86 billion in 2029 at a CAGR of 8.5%. Consumer electronics such as smartphones, laptops, and televisions are seeing increased integration into our daily lives, enhancing communication, productivity, entertainment, and convenience. The rising demand for these advanced devices is likely to propel the growth of the MIS chip capacitor market. In fact, MIS chip capacitors, by improving energy storage and enabling faster data processing, are making a significant contribution to the development of compact, high-performance consumer electronics.

Another key trend is the growing adoption of electric vehicles. Electric vehicles, powered by batteries and propelled by electric motors, compared to conventional internal combustion engines, offer significant improvements in range, charging speed, and cost efficiency. MIS chip capacitors are enhancing the adoption of electric vehicles by improving the efficiency and reliability of power management systems, enabling better energy storage and delivery, and boosting vehicle performance.

What Drives The Metal Insulator Semiconductor Market Growth?

Key industry players driving the growth of the market include TDK Corporation, STMicroelectronics NV, Murata Manufacturing Co. Ltd., Samsung Electro-Mechanics, Skyworks Solutions Inc., KYOCERA AVX Components Corporation, Vishay Intertechnology, Entegris, Taiyo Yuden, MACOM Technology Solutions Inc., Transcom Inc., Tokin America Inc, Viking Tech Corporation, Johanson Dielectrics Inc., SemiGen Inc., US Microwaves, Massachusetts Bay Technologies, Wei Bo Associates HK Ltd., ROHM Co. Ltd., and Lorlin Electronics Ltd

How Is The Metal Insulator Semiconductor Market Segmented?

The market highlights a broad segmentation:

- 1 By Type: Standard MIS Chip Capacitors, High-Performance MIS Chip Capacitors
- 2 By Product Type: Working Voltage Greater Than 100 Volts >100V, Working Voltage Greater Than 50 Volts >50V, Other Product Types
- 3 By Application: Consumer Electronics, Automotive, Telecommunications, Industrial, Other Applications.

What Is The Regional Analysis Of Metal Insulator Semiconductor Market?

The report unveils that North America was the largest region in the MIS chip capacitor market in 2024. It also suggests that Asia-Pacific is expected to be the fastest-growing region in the forecast period.
