

Preferred Utilities acquires Hays Cleveland Controls and Instrumentation product line from Cleveland Controls

Acquisition strengthens Preferred Utilities' product portfolio and offers continuation of service to Hays Cleveland customers.

DANBURY, CT, UNITED STATES, May 13, 2025 /EINPresswire.com/ -- Preferred Utilities Manufacturing Corporation, a leader in engineering-based solutions for commercial, institutional, and industrial facilities, is pleased to announce the acquisition of the Hays Cleveland Controls and Instrumentation product line from Cleveland Controls. This strategic acquisition strengthens Preferred's product portfolio and extends the company's commitment to delivering innovative, reliable, and expertly supported power solutions.

“

We're excited to welcome the Hays Cleveland Controls and Instrumentation product line into the Preferred product family.”

David Bohn, President and CEO of Preferred Utilities

Hays Cleveland's controls and instrumentation have been a cornerstone of safe and efficient operations in critical facilities for over 100 years. This transition provides a continuation of Hays Cleveland's quality products, with the added strength of Preferred's engineering expertise, support infrastructure, and commitment to growth. Preferred will provide continued access to existing products or offer a Preferred replacement if the Hays Cleveland product can no longer be produced in its current form.

“We're excited to welcome the Hays Cleveland Controls and Instrumentation product line into the Preferred product family,” said David Bohn, President and CEO of Preferred Utilities. “This acquisition is a natural fit with our focus on high-quality, engineered solutions. It increases our offering to current customers and brings Hays Cleveland customers the support and creativity

that Preferred is known for.”

Backed by over 100 years of industry experience, Preferred plans to invest in the development, service, and long-term growth of the Hays Cleveland control and instrumentation products to meet the evolving needs of the facilities that use them.
