How Is The Market Expected To Perform In The Coming
Years?

The pemphigus vulgaris market size is expected to witness

robust growth in the next few years. It will escalate to \$2.63 billion in 2029 at a compound annual growth rate CAGR of 7.8%. This growth during the forecast period can be attributed to the rise in clinical trials, growth in precision medicine, expansion of digital health solutions, increasing demand for biologics, and escalating use of telemedicine. The major trends during this forecast period include advancements in biologic therapies, regulatory approvals, the adoption of combination therapies, the development of personalized medicine, and innovations in oral formulations of biologic therapies.

What Are The Key Market Drivers Propelling The Market Growth?

The prevalence of autoimmune diseases is expected to propel the growth of the pemphigus vulgaris market going forward. Autoimmune diseases are disorders in which the immune system mistakenly attacks and damages the body's healthy cells, tissues, or organs. The prevalence is increasing due to genetic predisposition, environmental triggers, and lifestyle changes. Individuals with a family history of autoimmune diseases are more likely to develop them due to inherited immune system vulnerabilities. More individuals are being diagnosed with conditions like pemphigus vulgaris, driving the demand for advanced therapies. The Mayo Clinic Health System indicates the global incidence and prevalence of autoimmune diseases are rising with annual increases estimated at 19.1% and 12.5%, respectively. Thus, the prevalence of autoimmune diseases is fuelling the growth of the pemphigus vulgaris market.
