**Unzoned Flexibility:** No municipal zoning allows immediate development of battery energy storage systems (BESS), AI data centers, crypto mining, energy research, industrial, or microgrid projects.

**Infrastructure Proximity (Upgrades Required):** No high-voltage lines or major pipelines on-site. Nearby 345kV transmission infrastructure, solar farms, switching stations, water, gas, and fiber are within reasonable distance for buyer-funded tie-ins. A gas pipeline crosses the site, and a co-op water line runs along the street, with surface and water source is available for cooling or energy projects.

**Strategic Location:** 90 minutes from Dallas-Fort Worth, near Waco, Temple, and Red Oak's 3.4M

sq ft DataBank campus, in Texas's AI and energy corridor.

Low Cost: \$1.2M (\$14.6K/acre) versus \$50K to \$400k/acre in other sites, offering instant equity for global investors.

Quick-Close Deal: Close by July 15, 2025. Only funded inquiries accepted.
