

IVY IV Aesthetics Launches Nordlys™ by Candela—Bringing Next-Level Skin Rejuvenation to Hanover, NH

HANOVER, NH, UNITED STATES, May 14, 2025

/EINPresswire.com/ -- [IVY IV Aesthetics](#) is thrilled to

announce the addition of the [Nordlys™](#) system by Candela—a cutting-edge laser and light-based platform that elevates aesthetic care through advanced treatment options for skin rejuvenation, pigment correction, and overall skin health.

“

Our team is dedicated to offering the latest innovations in skincare and beauty, and the Nordlys device represents a significant advancement in laser technology.”

Renée Cather

With a focus on evidence-based treatments and a commitment to excellence in patient care, IVY IV Aesthetics continues to expand its offerings by incorporating the latest medical aesthetic technology into its Hanover med spa. The Nordlys™ system’s innovative combination of Intense Pulsed Light (IPL) and Frax fractional non-ablative lasers allows clients to safely and effectively address a wide variety of skin concerns with minimal downtime.

A Smarter Approach to Skin Health

The Nordlys™ system harnesses two powerful technologies:

Narrowband IPL (Intense Pulsed Light) for photorejuvenation, targeting brown spots, facial redness, broken capillaries, rosacea, and overall tone correction.

Frax 1550 and Frax 1940 fractional lasers for non-ablative resurfacing that improves skin texture, fine lines, acne scarring, and stimulates collagen renewal.

Each treatment is guided by Candela’s proprietary technology for enhanced comfort and control, including SoftCool™, which delivers cooling airflow for a more comfortable experience. These therapies are non-invasive, require minimal recovery time, and deliver long-lasting, natural-looking results.

Ideal Candidates

Nordlys™ is ideal for men and women looking to address sun damage, uneven skin tone, rosacea, vascular lesions, acne scars, and early signs of aging. Because treatments are highly

customizable, IVY IV Aesthetics is able to tailor every session to the patient's individual skin type, lifestyle, and aesthetic goals.

"Our team is dedicated to offering the latest innovations in skincare and beauty, and the Nordlys device represents a significant advancement in laser technology," said Renée Cather, founder and owner of IVY IV Aesthetics. "With this new addition, we can deliver even more effective, safe, and comfortable treatments, tailored to meet the unique needs of our clients."

Experience the Nordlys™ Difference

Visit IVY IV Aesthetics and discover the transformative power of the Nordlys™ system. Whether you're looking to improve skin tone and texture, reduce visible signs of aging, or address concerns like sun damage and redness, their expert team is here to help you achieve radiant, healthy skin with personalized treatment plans.
