Explores Market Driver, Trends, Regional Insights - Market Sizing & Forecasts Through 2034

How has the Spina Bifida In-Utero Market Evolved and What is its Future Outlook?

The spina bifida in utero market size has charted strong growth in recent years. The market expanded from \$2.42 billion in 2024 to an anticipated \$2.66 billion in 2025, marking a compound annual growth rate CAGR of 9.5%. Growth in this historic period can primarily be attributed to the increasing prevalence of spina bifida, growing awareness about fetal surgery, awareness of risks associated with rising maternal age, increasing healthcare expenditure, and ongoing research and development in fetal medicine.

What Factors Underpin the Projected [Growth of the Spina Bifida In-Utero Market?](#)

The spina bifida in utero market is set for strong growth in the coming years, with predictions indicating a rise to \$3.77 billion in 2029, a compound annual growth rate CAGR of 9.2%. Growth in the forecast period can be attributed to a myriad factors including rising awareness about prenatal diagnosis and treatment, increasing adoption of minimally invasive procedures, encouraging government initiatives and funding, expanding healthcare infrastructure in emerging markets, and a greater number of specialized fetal surgery centers.
