

Graphene-X Launches the ThermAdapt™ GX-Merino Heated Jacket in Kickstarter

HK, HONG KONG, May 16, 2025 /EINPresswire.com/ -- [Graphene-X](#), the innovative apparel brand behind the award-winning AeroGraph Collection (Puffer Jacket and Denim Jeans), has launched its 11th [Kickstarter](#) campaign for the ThermAdapt™ GX-Merino [Heated Jacket](#)—and it's already a phenomenon, raising over \$150,000 in the first 12 hours of campaign. This groundbreaking piece of outerwear combines self-regulating heating tech, merino wool comfort, and modular design to replace multiple layers with a single, adaptable solution.

Key Features:

1. **AI-Powered Heating (iWARM 5.0):** Climate control for your body. The jacket's AI-driven sensors auto-adjust heat levels in real-time (front pockets, back panels) via manual, app, or smart auto mode. Just connect a power bank and let it think for you—no more guesswork.
2. **Modular Design for Any Adventure:** Detachable sleeves and hood transform it from an alpine-ready coat to a sleek urban vest in seconds. Engineered for total flexibility and available in men's and women's cut.
3. **Graphene + Merino Wool:**

The features of the ThermAdapt GX-Merino Heated Jacket by Graphene-X

Unmatched Weather Resistance. These graphene & merino wool enhanced textiles offer next-level weather resistance—breathable, water-repellent, and 100% toxin-free. No chemical coatings here, just baked-in durability that performs.

4. Award-Winning Innovation: Fresh off winning the Innovation Award at ISPO Munich 2024 (the "World Cup" of outdoor gear), Graphene-X proves again why they're leaders in tech-driven apparel. While others try heated jackets, very few match their track record or R&D.

5. Thoughtful Travel & Storage Features: Built-in sleep beanie (detachable for flights), 4+2 secure pockets, and a minimalist multi-terrain design—because performance shouldn't sacrifice style or convenience.

Why It Matters:

"Most 'smart' jackets force you to choose between warmth, versatility, and style," says Jorge Barros, Founder of Graphene-X. "The ThermAdapt™ eliminates that compromise. It's a jacket that fully adapts to your body and environment—whether you're on a freezing flight, a rainy commute, or a mountain trail."

Kickstarter Exclusive:

Early backers can secure the ThermAdapt™ for USD \$289 (retail price will be \$399).

Campaign Details:

□ Live May 13, 10 AM EST on Kickstarter
