what is fueling this drive in the polymyositis market?

The increasing prevalence of autoimmune diseases is the pivotal factor propelling the market. Due to the overactive immune response triggered by certain genetic variants, individuals are more prone to mistakenly attacking their own tissues leading to autoimmune diseases. This susceptibility combined with various environmental triggers like infections, stress, and lifestyle modifications contribute to the rising incidence of autoimmune conditions. Polymyositis, an autoimmune disease, enhances the understanding of such conditions by demonstrating how immune system dysfunction leads to muscle inflammation, providing insights into probable treatments.
