

Levels Ventures Launches a Dedicated Ai Consulting Practice to Accelerate AI-Readiness for B2B Enterprises across APAC

Levels Ventures Launches Pivotal AI, a Dedicated Consulting Practice to Accelerate AI-Led Growth for B2B Enterprises across APAC and MENA

SYDNEY, NEW SOUTH WALES,
AUSTRALIA, May 16, 2025

/EINPresswire.com/ -- Global go-to-market advisory firm [Levels Ventures](#) announced the launch of [Pivotal AI](#), an AI-focused consulting brand created to help B2B technology vendors and their channel partners modernize how they sell, market, and scale in the age of artificial intelligence. Operating from hubs in Australia and Hong Kong, with expanding delivery teams in Singapore and the Philippines, Pivotal AI will serve clients throughout the Asia-Pacific region while building out support for high-growth markets in the Middle East and North Africa (MENA).

The new practice arrives at a pivotal moment. Generative AI, predictive analytics, and intelligent automation have shifted from experimental pilots to commercial imperatives for enterprises of every size. Yet many vendors and partners struggle to translate AI potential into repeatable revenue. Pivotal AI bridges that gap with hands-on programs that align business strategy, go-to-market execution, and partner ecosystems around measurable growth outcomes—without imposing unnecessary complexity.

“Pivotal AI was created for forward-looking companies ready to move beyond AI hype,” said Maury G, Managing Partner at Levels Ventures. “We focus on practical AI execution—aligning strategy, GTM, and partner ecosystems to real growth outcomes.”

Maury G - Global AI Advisor and Managing Partner

Practical programs designed for channel-centric growth

Pivotale AI offers a portfolio of services that embeds artificial intelligence into every stage of the revenue engine. Bespoke AI sales-enablement tracks empower both direct and indirect sellers to position value and close deals faster, while go-to-market acceleration playbooks are calibrated to each client's sales maturity, industry focus, and geographic coverage. AI-driven attach and pipeline boosters help vendors scale partner-led impact by surfacing the next best offer and activating cross-sell motions in real time. Finally, the practice's partner-readiness curriculum guides managed service providers (MSPs), resellers, and system integrators through solution design, AI governance, and demand-generation planning so that the entire channel benefits from a shared blueprint for growth.

Deep roots in the APAC partner ecosystem

Levels Ventures already supports global technology leaders such as Microsoft, Dell Technologies, and Equinix, along with tier-one distributors including Logicom, Ingram Micro, and VST ECS. Pivotale AI builds on that credibility with a regional team that combines enterprise GTM expertise, data science, and channel program design. The practice's consultants are embedded close to customers in Singapore, Sydney, Melbourne, Hong Kong, and Manila, ensuring in-market activation and culturally nuanced support.

Spotlight at [GITEX Asia](#) 2025

Pivotale AI's vision gained industry attention in April 2025 at Singapore's inaugural GITEX Asia event. Maury G moderated the high-profile "Telco AI Shift" panel—where executives from leading carriers explored the monetization of network data through AI—and later delivered a keynote at the SME Digital Summit, outlining how mid-market businesses can unlock AI-enabled efficiency without enterprise-level budgets. The reception underscored a growing demand for pragmatic guidance that turns AI rhetoric into sustainable revenue streams.

Strengthening the APAC–MENA corridor

Although the practice will initially concentrate on Australia, Singapore, and Hong Kong, Pivotale AI is already laying the groundwork for expansion into the Gulf Cooperation Council (GCC) countries and broader MENA region. Levels Ventures expects the APAC–MENA corridor to become critical for AI-driven innovation over the next decade. Pivotale AI's framework is designed to scale seamlessly as regional channel dynamics evolve.
