

# Fasoo Explores AI Security and Governance at iSMG Data Security Summit in Dallas

BETHESDA, MD, UNITED STATES, May 19, 2025 /EINPresswire.com/ -- [Fasoo](#), a leader in data-centric security, successfully concluded its participation at the [iSMG Data Security Summit](#) in Dallas, where [Ron Arden, Executive Vice President, CTO, and COO](#), led an insightful session on the critical intersection of AI, security, and governance.

Arden's session, titled "Navigating the AI Frontier: Security, Privacy, and Governance in the Age of LLMs," addressed the pressing challenges organizations face in securing data amidst the rapid advancement of Large Language Models (LLMs) and Generative AI (GenAI).

The session highlighted the necessity for comprehensive data governance strategies to protect sensitive information, intellectual property, and ensure compliance with evolving privacy regulations, like the Texas Data Privacy and Security Act (TDPSA).

Attendees gained valuable insights into safeguarding data in an environment where internal and external threats, whether malicious or unintentional, are amplified by AI technologies. Arden emphasized the pivotal role of data lineage in establishing robust governance frameworks and provided actionable strategies for CISOs to develop secure, modern governance architectures.

Key takeaways from the session included strategies for protecting sensitive data and intellectual
