

# YomteY -Pioneering Advanced Water Management Technologies

NINGBO, CHINA, May 20, 2025

/EINPresswire.com/ -- YomteY, the flagship brand of Dongguan Ameike Valve Co., Ltd., has established itself as a leading high-end fluid control enterprise. With 20 years of industry experience and 15 years of manufacturing excellence, the company achieved national high-tech enterprise qualification in 2025. This milestone underscores its commitment to technological advancement and industry leadership.

Founded in 2010, with roots dating back to 2004, YomteY has grown from a local valve business department into an international leader in the smart water meter and valve industry.

Strategic partnerships with global enterprises, including Danfoss, Flowcon, Frese, VIR, Amico, and IMG, have strengthened its reputation as a trusted provider of fluid control solutions worldwide.

"Our journey from a small operation to a comprehensive group of companies reflects our commitment to innovation and quality in everything we do," said a YomteY spokesperson. "This recognition as a national high-tech enterprise validates our ongoing investment in research and development."

**Core Technology and Leadership** YomteY's success is driven by a strong focus on technological advancement. The Dongguan-based global R&D center serves as the core of operations, developing advanced communication chips and remote control systems that power smart fluid control solutions.

YomteY -Pioneering Advanced Water Management Technologies

An intelligent manufacturing system, centered on chip development, ensures complete control over the product lifecycle, from independent development to finished product transformation. This approach guarantees superior quality and performance across all offerings.

Since establishing the remote intelligent platform R&D center in 2015, YomteY has secured numerous national patents for intelligent products and business systems. A forward-thinking approach to Internet of Things (IoT) technology positions YomteY at the forefront of the smart water management revolution, delivering solutions that combine precision, reliability, and connectivity.

**Comprehensive Product Portfolio**  
YomteY offers a diverse range of smart water meters known for precision, durability, and intelligent connectivity. These meters utilize proprietary communication technology to enable real-time monitoring, data collection, and analysis, assisting utilities and property managers in optimizing water usage and detecting issues like leaks or unauthorized consumption.

Electric valve solutions form another cornerstone of YomteY's portfolio. Engineered for reliability, these valves comply with international standards, including GB, API, ANSI, DIN, BS, MSS, EN, and JIS. Applications span water utilities, petrochemical plants, food processing, heating systems, metallurgical equipment, and fire protection installations.

Integrated smart systems provide comprehensive water management and control capabilities. Combining hardware excellence with sophisticated software platforms, these solutions deliver

actionable insights and remote control functionality, enabling unmatched efficiency and resource optimization.

**Global Presence and Manufacturing Excellence** YomteY's manufacturing capabilities span multiple production bases in Dongguan, Quanzhou, Ningbo, Taizhou, Tianjin, and Dandong, covering a combined area of 120,000 square meters. Equipped with state-of-the-art machinery and staffed by skilled professionals, these facilities prioritize quality and precision.

International certifications, including ISO4064-1:2014 for water meters, ISO9001:2015 for quality management, ISO14001:2015 for environmental management, and CE certification for European market compliance, validate YomteY's commitment to excellence. These credentials support expansion into global markets.

Through Guangdong Estanton Co., Ltd., YomteY's dedicated export business unit, the company has penetrated international markets, delivering special solutions worldwide. A global approach combines universal quality standards with localized service and support to ensure customer satisfaction across regions.

**Customer-Centric Solutions** YomteY provides comprehensive OEM and ODM capabilities, offering customized solutions tailored to specific applications and environments. This flexibility makes YomteY a preferred partner for businesses seeking bespoke fluid control solutions.

"We don't believe in one-size-fits-all approaches," the YomteY spokesperson noted. "Whether it's a municipal water utility, an industrial facility, or a commercial building, we work closely with our clients to understand their specific needs and deliver solutions that exceed their expectations."

A customer-centric philosophy extends to comprehensive service and support, covering consultation, system design, installation, commissioning, and ongoing maintenance. This ensures optimal system performance throughout the product lifecycle.

**Sustainable Development and Future Outlook** As water scarcity and resource efficiency gain global attention, YomteY remains dedicated to sustainable water management solutions. Smart meters and control systems help reduce waste, optimize usage, and minimize environmental impact by providing data and control capabilities for effective strategies.

YomteY's development roadmap includes expanding its product portfolio, penetrating international markets further, and investing in research and development. The vision to become the industry's leading technical solution provider drives its strategy, with a focus on quality, advancement, and customer satisfaction.

"The future of water management lies in smart, connected systems that provide unprecedented levels of insight and control," the spokesperson added. "At YomteY, we're committed to leading this transformation and helping our customers build more efficient, sustainable operations."

**Collaboration Opportunities** YomteY invites potential partners, distributors, and customers to explore collaboration opportunities leveraging its technological expertise, manufacturing capabilities, and industry experience. Partnerships addressing emerging water management challenges are of particular interest, aiming for mutually beneficial relationships.

With superior products, high quality standards, competitive pricing, and comprehensive supply chain services, YomteY is well-positioned to support partners in achieving business objectives while advancing efficient, sustainable water management practices worldwide.

About YomteY YomteY, the flagship brand of Dongguan Ameike Valve Co., Ltd., specializes in smart water meters, electric valves, and intelligent systems. With 20 years of industry experience and 15 years of manufacturing excellence, YomteY delivers special technology, superior quality, and exceptional service. The YomteY Group comprises eight affiliated companies, covering R&D, manufacturing, international trade, and specialized applications in the smart water industry.
