

Prescription Dermatological Drugs Global Market Set to Soar to \$40.38 Billion by 2025

The Business Research Company's Prescription Dermatological Drugs Global Market Report 2025 – Market Size, Trends, And Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, May 20, 2025

/EINPresswire.com/ -- The prescription

dermatological drugs market size has

grown robustly in recent years and shows promise to continue this growth trajectory. By 2025, the market is projected to be worth \$40.38 billion, up from \$37.77 billion in 2024, representing a compound annual growth rate CAGR of 6.9%. The growth can be attributed to the rising prevalence of skin disorders, the increased awareness of skin health, the growth in dermatology

clinics, an expanding geriatric population, a rise in healthcare spending, and increase in R&D investments.

The Business Research Company's Latest Report Explores Market Driver, Trends, Regional Insights - Market Sizing & Forecasts Through 2034”

The Business Research Company

Why Is The Prescription Dermatological Drugs Market Experiencing Robust Growth?

The prevalence of dermatological conditions is on the rise, and it is largely responsible for driving the growth of this market. Dermatological conditions are disorders of the skin, hair, or nails -for example, eczema, psoriasis, and acne- which require medical treatment to manage symptoms effectively. Increasing exposure to

environmental pollutants, lifestyle changes, and rising stress levels are all contributing to an increased prevalence of these dermatological conditions. Prescription dermatological drugs play a crucial role in managing these conditions, offering targeted treatments that help alleviate symptoms and improve long-term skin health.
