

DRIVEROO ADDS AUTOMATED WARRANTY MANAGEMENT TO HELP BUSINESSES REDUCE MAINTENANCE COSTS

New Warranty Management Module Integrated With Work Orders Delivers On The Spot Cost Savings Guidance

BURLINGAME, CA, UNITED STATES, May 26, 2025 /EINPresswire.com/ -- [Driveroo](#), powered by [ROO.AI](#), announced today the availability of a new platform module for [Warranty Management](#) to simplify the process of identifying repairs under warranty and recovering warranty repair costs. The new Warranty Module is integrated with existing Driveroo Work Orders and Parts Management modules. This new addition to the Driveroo platform provides an easy, out-of-the box ready process to help maintenance teams spot parts covered under warranty during repairs and automate the process of filing warranty claims to reduce repair and maintenance costs.

"Having made equipment maintenance on mobile easier and faster, our customers have been asking us to help extend the benefits of Driveroo to improve their ability to identify and access savings on warranty coverage," said Leo Sigal, Founder and CEO of Driveroo. "Leveraging the on the spot mobile work order functionality of the platform, our new warranty management module injects a focus on cost recovery right into the repair process."

This new functionality in the Driveroo platform will appeal to maintenance service providers and companies in transportation, logistics and construction that not only need to keep their equipment up and running, but also need to ensure cost efficiency in equipment operations. Warranty coverage can be assigned to parts at various levels and maintenance teams are automatically notified when a covered part is included or added to a work order. Driveroo warranty dashboards provide visibility to work orders and repair items under warranty and automate the preparation of warranty claim information. A much requested complement to Driveroo's existing Maintenance, Parts and Vendor Management functionality, Warranty Management aligns operational efficiency with cost management for maintenance organizations.

About

Driveroo, powered by ROO.AI, is the easiest to use equipment inspection management solution for guiding operators, using their mobile devices, to save time and increase accuracy with equipment inspections, maintenance and safety work processes. And Driveroo enables

companies with small and large fleets of all types of assets to quickly and affordably streamline operations, improve equipment availability and cut operating costs. Driveroo's unique visual workflows are a next generation breakthrough from the paper, and paper-like digital forms, that currently slow down operators and lead to inefficiencies. Driveroo is in use with hundreds of companies across several continents for transportation, construction, logistics and warehousing equipment safety and maintenance.
